TO WHOM IT MAY CONCERN

RE: Linda Skomorowski

Linda will complete a nine month pre-employment course in plumbing at the end of May. Academically she is at the top of her class. Her practical shop work is average to above average. I believe she could be of value to a plumbing and heating firm in the areas of office staff through to on the job installations. Linda is not afraid of work and is capable of learning many facets of the trade.

Yours truly,

G. E. Milne
Instructor
