

Safe Night LLC Services Overview

Services

Safe Night LLC is a consulting agency specializing in improving best practices through training to help reduce liability for restaurants that hold Alcohol Beverage Control licenses.

Adhering to laws and regulations set forth by the Department of Alcohol Beverage Control and local jurisdictions are necessary for restaurants to be safe and economically viable. Consequences of violations can lead to loss of licensure and the risk of litigation. Safe Night LLC provides comprehensive strategies to create a safe environment that can increase profitability and help reduce liability.

Safe Night LLC adapted best practices and policies from the national accreditation program called *Best Bar None* in Great Britain. The model was designed to increase safety for patrons and staff while increasing economic viability. Creating a safe environment can make businesses more profitable, lessen the draw on local government resources, and improve community relations. Safe Night LLC provides responsible alcohol service training using TiPS (Training for Intervention ProcedureS).

Additionally, Safe Night LLC provides sexual assault intervention training called Safe Night Active Bystander Training. This staff training focuses on intervention strategies to reduce sexual assault and harassment.

Best Practices and Analysis

Safe Night LLC performs a full analysis of your restaurant's current operations and identifies areas of increased liability. Most restaurants believe they operate safely but are not aware of the risk of not having formalized employee policies. Adopting standardized best practices into an establishment's existing policies or employee handbooks will help employees comply with the law and help reduce liability.

What are the benefits of partnering with Safe Night LLC?

- Safe Night LLC provides training and resources to help reduce liability
- Running a safe restaurant can increase economic viability
- Formal best practices and policies demonstrates professionalism to staff
- Improves communication with local and state officials
- Improved best practices and policies can improve community satisfaction

The community and local government agencies will recognize and appreciate an establishment's dedication to the increased safety of patrons and staff. Safe Night LLC is committed to giving restaurant owners who serve alcohol all the resources, education, and guidance necessary to be safe and economically viable.

Contact Safe Night LLC today to find out how we can improve your restaurant.

Training

Safe Night LLC provides training to employees to increase awareness and compliance with the law. Relying on informal, undocumented training leaves a restaurant open to the risk of civil litigation.

Safe Night LLC can help reduce this risk by making the following training available to employees:

- Responsible alcohol service training using TIPS
- Safe Night Active Bystander Program – Intervention training to reduce sexual assault and harassment
- Fake identification detection training
- Criminal and civil liability exposure for employees
- Public safety expectations
- VA ABC code review
