#ShadeOutDM

Shade Out DM was born in 2017 when KC the corgi succumbed to this disease known as Degenerative Myelopathy aka "DM". Similar to the human disease known as "ALS" or Lou Gehrig's Disease, DM is a debilitating, progressive, and fatal disease that affects over 100 breeds of dogs. KC was already a social media influencer as she had spent the last 3+ years of her life sharing her DM journey with the world. Thousands of people "followed" her progress and experienced the "ups & downs" as she met each day with a new challenge but continued to "Corgi On" with her determined "Corgi Strong" spirit living her best life as a handicapped pup. She took her fans through all of the phases of the journey and even shared her hydrotherapy sessions online. KC would entertain her "furiends" by posting pics of her wearing different styles of sunglasses so that is how the name ***Shade*** **Out DM** was conceived.
