ABOUT HOOD EQUIPMENT CANADA: Bruce Hynnes founded Hood Logging Equipment in 1984 with 6 slashers and a parts and service department he ran out of his garage. Over the last 36 years Bruce has watch his fledging business grow to a 30 person operation servicing Central Canada from Alberta to Southern Ontario. Bruce Hynnes founded Hood Logging 36 years ago and is now proud to see his dream has grown into a 30 person operation. With the addition of excavators in the early 90's Hood has enjoyed substantial growth by expanding from primarily logging equipment and into the construction and mining industries. We now supply over a thousand companies across Central Canada and the Northern States. Hynnes believes that our ability to service such a diverse base of clientele is due in large part to the versatility of products in accommodating attachments. "Our customers often need an excavator with specific attachments," says Hynnes. "Versatility is what our clients need and its what we deliver."
