- And More!

Add Custom Elements to Your Vehicle Identification Solution.

Printing Options and Benefits

SHORT LEAD TIMES

All printing is done in-house on commercial thermal printers and will not increase standard lead times (often 10 days or less) or minimum order quantities.

ADDED SECURITY

We can print your tag information (Facility Code, ID, etc.) in Barcode or QR code format, which can be read by most smartphones with the appropriate app.

CUSTOM LOGOS

Black logos can be printed in-house and will not increase standard lead times or minimum quantities. Color logos will require longer lead times and higher order quantities.
