* edited 6/8/25 - regretfully must go asap - just been notified I am on the urgent list for surgery. I need to see them loved and settled in their new homes before I get admitted. *

Born 02/06/25. Ready to go 28/7/25. Raised in a working country home – ready to fit in with your routine. Been exposed to car rides, older children, other dogs. Sleep inside in a playpen - so crate ready. Surprise sizing – mum is a labradoodle - standard poodle/Labrador size under 25kg at her heaviest. Dad is a combination and carries size genes/DNA for small to large poodle – Hubert 14kg - from Little Buddy Puppies. Breeder Rego DACO181594. Dad Huberts Breeder Rego DACO223610
 Most likely to be smaller and lighter than mum - more of the slight poodle frame than bulky labrador frame. In size - smallest to largest - Choco - Diva - Dozer.
