Supervision from the LAXPRO™ mobile application

# LAXPRO

## OUR WEB PLATFORM

- Only one web platform for complete control
- LAXPRO™ web management software integrates several types of devices on the same platform, allowing managers, security guards or supervisors to easily view, follow and receive notifications in order to react quickly ... because every second counts!
- Web access via PC et MAC
- Mobile Application iOS & Android

# IDEAL FOR:

• DELIVERY MAN,  
TECHNICIANS,  
INSTALLERS

• SECURITY GUARD

• TAXIS,  
LIMOUSINES

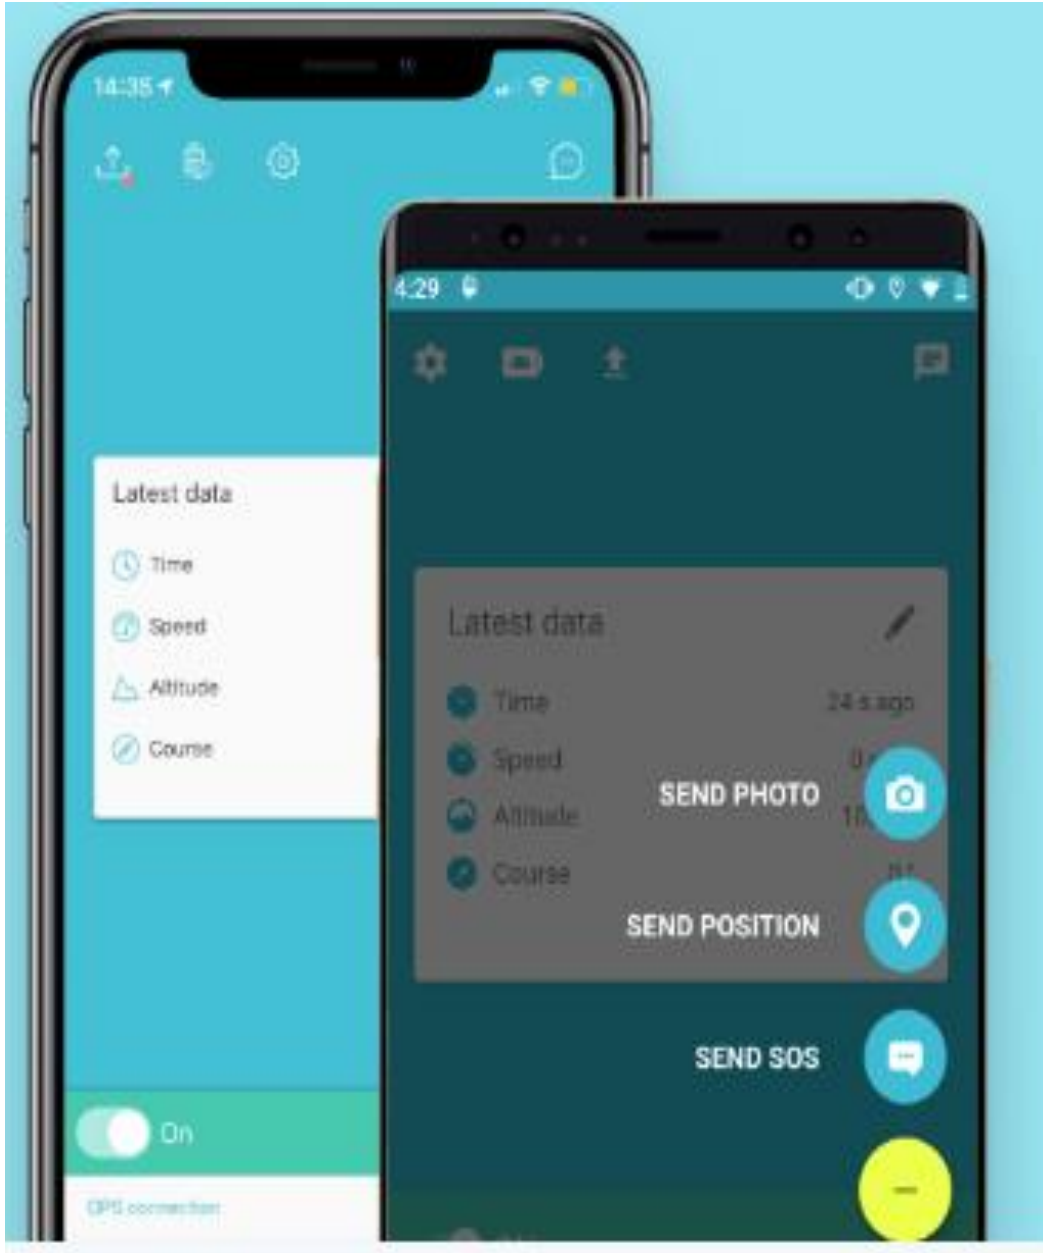

• COMMERCIAL  
REPRESENTATIVE

• MOBILE WORKERS

• SECURITY ON  
SCHOOL CAMPUSES

## Features

- Economic: No equipment to buy  
Installation on iOS or Android smartphone or tablet

- SOS Button and automatic call

- Photos taken are instantly sent and logged to the LAXPRO™ platform including date, time & location

- Manual Sending of position or on a regular frequency

- QR codes reading for security guard checkpoints

- Internal chat with dispatch and workers

- All data reported in realtime to the portail LAXPRO™ portal

## Latest data at hand

View the main tracking parameters on the home screen for quick checks. The data is automatically updated according to the latest messages from the unit.

## Data from workers

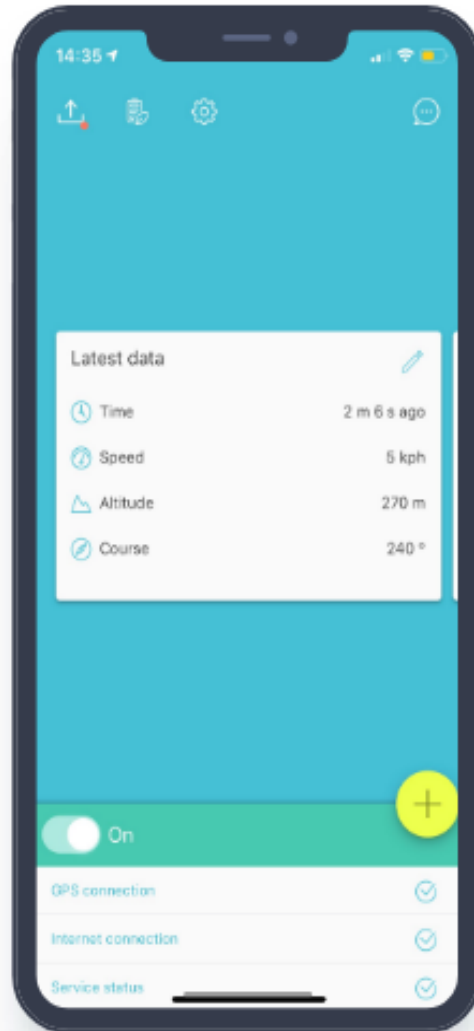

Workers are able to send pictures, SOS messages, or location info. Be notified about the situations when personnel needs help or instructions.

## Custom statuses option

Tailor the app to business needs; set up the required statuses and get messages with custom parameters to know what's happening in the field.

## QR codes employment

Let workers log in with a QR code. Have them scan QR codes at certain points or situations (for example, at the end of the route).

## Efficient battery use

Let workers employ user modes which consume various battery power amounts; offer a power saving mode to make the devices last longer.

## Various user modes

Choosing preset mode (Active/Standard/Lite) or creating your own (Custom).

## Remote control

Request actions such as a camera snapshot or a service stop and change settings of the app remotely to proactively guide the workers.

## Chat with employees

Send and receive various types of messages from the field workers for close and detailed day-to-day communication.

# Powerful features

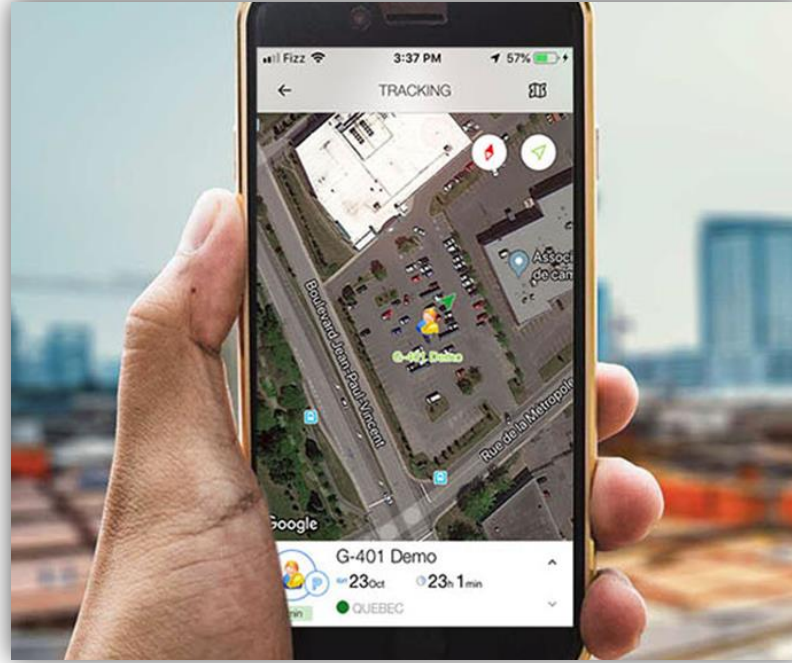

# Users

- Never alone. Always someone ready to respond, communicate, and locate quickly.
- Five quick functions on the screen are accessible

# Managers

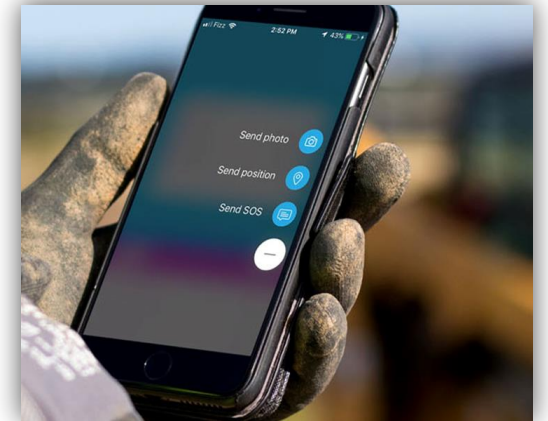

Real-time information to locate, communicate and act when needed.

- Staff, equipment and vehicles on one screen
- Meets minimum OSHA requirements for a safe work environment
- Avoids unnecessary travel and increases productivity
