

NOVELTIES 2025

Lumen center.

Lumen center.

_ New Chapter

Fondata nel 1976 dal designer francese Gilles Derain, Lumen Center, rinomato produttore italiano di illuminazione di alta gamma è orgoglioso di annunciare un nuovo capitolo della sua storia.

Nel 2020, Lumen Center è stata acquisita da Zelzar Holding. Questo investimento ha permesso all'azienda di rafforzare il proprio team con esperti del settore che in precedenza hanno lavorato per alcune delle più rinomate aziende di illuminazione.

Grazie all'unione di tecniche tradizionali e tecnologie avanzate, Lumen Center pensa, realizza ed assembla i suoi prodotti all'interno dello stabilimento di Santo Stefano Ticino, in provincia di Milano; dimostrando così la propria dedizione verso l'artigianalità italiana, l'attenzione ai dettagli ed il raggiungimento di alti standard qualitativi.

In occasione di Euroluce 2025, Lumen Center presenta la versione a parete della lampada Washington, la lampada Swan di Carlo Forcolini e prodotti nati grazie a collaborazioni con architetti come Luta Bettonica, Giancarlo Leone e Gabi Peretto, figure chiave della storia del design milanese.

- Founded in 1976 by the French designer Gilles Derain, Lumen Center, a renowned Italian high-end lighting manufacturer, is proud to announce a new chapter in its history.

In 2020, Lumen Center was acquired by Zelzar Holding. This investment allowed the company to strengthen its team with design experts who previously worked for some of the most renowned companies in the lighting field.

Through the combination of traditional techniques and advanced technologies, Lumen Center designs, manufactures and assembles its products within the Santo Stefano Ticino facility, in the Milan area. Demonstrating its dedication to Italian craftsmanship, attention to detail and achievement of high quality standards.

At Euroluce 2025 Lumen Center presents the wall version of the Washington lamp, Swan lamp by Carlo Forcolini and products born from collaborations with architects such as Luta Bettonica, Giancarlo Leone and Gabi Peretto, key figures in the history of Milanese design.

- Fondée en 1976 par le designer français Gilles Derain, Lumen Center, un fabricant italien renommé d'éclairage haut de gamme, est fier d'annoncer un nouveau chapitre de son histoire.

En 2020, Lumen Center a été acquis par Zelzar Holding. Cet investissement a permis à l'entreprise de renforcer son équipe avec des experts du secteur qui ont précédemment travaillé pour certaines des entreprises d'éclairage les plus renommées.

Grâce à la combinaison de techniques traditionnelles et de technologies avancées, Lumen Center conçoit, fabrique et assemble ses produits dans l'usine de Santo Stefano Ticino, en province de Milan; témoignant ainsi de son engagement envers l'artisanat italien, son souci du détail et la poursuite de normes de qualité élevées.

À l'occasion d'Euroluce 2025, Lumen Center présente la version murale de la lampe Washington, la lampe Swan de Carlo Forcolini et des produits nés de collaborations avec des architectes tels que Luta Bettonica, Giancarlo Leone et Gabi Peretto, figures clés de l'histoire du design milanais.

- Gegründet 1976 vom französischen Designer Gilles Derain, ist Lumen Center, ein renommierter italienischer Hersteller hochwertiger Beleuchtung, stolz darauf, ein neues Kapitel in seiner Geschichte anzukündigen.

Im Jahr 2020 wurde Lumen Center von Zelzar Holding übernommen. Diese Investition ermöglichte es dem Unternehmen, sein Team mit Lichtdesignexperten zu verstärken, die zuvor für einige der renommiertesten Unternehmen der Branche tätig waren.

Durch die Kombination traditioneller Techniken und fortschrittlicher Technologien entwirft, fertigt und montiert Lumen Center seine Produkte in der Anlage in Santo Stefano Ticino im Raum Mailand. Damit demonstriert das Unternehmen seine Hingabe an italienische Handwerkskunst, seine Liebe zum Detail und das Erreichen hoher Qualitätsstandards.

Auf der Euroluce 2025 präsentiert Lumen Center die Wandversion der Tischleuchte Washington, die Leuchte Swan von Carlo Forcolini sowie Produkte, die aus der Zusammenarbeit mit Architekten wie Luta Bettonica, Giancarlo Leone und Gabi Peretto, Schlüsselfiguren in der Geschichte des Mailänder Designs, entstanden sind.

Made in Italy

Da quasi 50 anni, Lumen Center è un laboratorio che persegue l'eccellenza. Fin dalle sue origini, l'azienda ha tratto ispirazione e forza creativa da esperienze e collaborazioni a livello internazionale, ma è nella produzione Made in Italy, che prevalentemente avviene nel nostro stabilimento di Santo Stefano Ticino, che trova la sua principale forza.

La qualità dei materiali, l'attenzione ai dettagli e la maestria artigianale sono i tratti distintivi del know-how aziendale. Pur mantenendo una solida tradizione artigianale, Lumen Center continua a esplorare nuove soluzioni e ad adottare tecnologie all'avanguardia. Il risultato è la creazione di prodotti in cui l'essenza del design si fonde armoniosamente con la perfetta funzionalità.

For almost 50 years Lumen Center has been laboratory that pursues excellence. Since its beginnings, the company has drawn inspiration and creative strength from international experiences and collaborations, but it is in the Made in Italy production, which predominantly takes place in our factory in Santo Stefano Ticino, that this finds its main strength.

Quality materials, attention to detail, and artistry are the hallmarks of the company's know how. Alongside the solid traditional craftsmanship, Lumen Center continues to explore new solutions and to adopt cutting-edge technology. The outcome is the creation of products in which the essence of the design blends harmoniously with perfect functionality.

Depuis près de 50 ans, Lumen Center est un laboratoire qui vise l'excellence. Depuis le début, l'entreprise a su puiser son inspiration et sa force créative dans les expériences et les collaborations internationales, mais son plus grande atout, c'est la production strictement Made in Italy, qui se déroule principalement dans son usine de Santo Stefano Ticino.

Qualité des matériaux, souci du détail et savoir-faire artisanal sont les maîtres-mots du savoir-faire de l'entreprise. Dans le sillage d'une longue tradition artisanale, Lumen Center continue d'expérimenter de nouvelles solutions et des technologies de pointe, donnant vie à des produits qui conjuguent admirablement la quintessence du design et une parfaite fonctionnalité.

Seit fast 50 Jahren ist Lumen Center in Labor von großer Bedeutung, das nach Exzellenz strebt. Seit seinen Anfängen schöpft das Unternehmen Inspiration und kreative Kraft aus internationalen Erfahrungen und Kooperationen, aber seine größte Stärke liegt in der Produktion "Made in Italy", die überwiegend in unserem Werk in Santo Stefano Ticino stattfindet.

Hochwertige Materialien, Liebe zum Detail und Kunstfertigkeit sind die Markenzeichen des Know-hows des Unternehmens. Neben der soliden traditionellen Handwerkskunst erforscht Lumen Center immer wieder neue Lösungen und setzt modernste Technologien ein. Das Ergebnis ist Produkte, bei denen sich die Essenz des Designs harmonisch mit perfekter Funktionalität verbindet.

Carlo Forcolini

Carlo Forcolini, designer dal 1970, rappresenta un insolito caso interculturale e cross-operativo.

I suoi prodotti sono stati selezionati per la prima volta da Gio Ponti per Domus nel 1971. Dopo una breve collaborazione con lo studio dei fratelli Castiglioni e una lunga attività professionale con Vico Magistretti, inizia a lavorare come product designer per Alias, Amar collezioni, Artemide, Caimi, Cassina, De Padova, Gervasoni, Luceplan, Nemo, OY Light, Pomellato, Valenti e Zumtobel. Successivamente diventa co-fondatore e amministratore delegato di Amar Collezioni, Alias, Nemo e OY Light.

Dal 2002 al 2008 è stato Presidente Nazionale di ADI vincendo il premio Compasso D'Oro alla carriera nel 2020.

Carlo Forcolini, a designer since 1970, represents an unusual intercultural and cross-operational case. His products were first selected by Gio Ponti for Domus in 1971. After a brief collaboration with the Castiglioni brothers' studio and a long professional activity with Vico Magistretti, he began working as a product designer for Alias, Amar collezioni, Artemide, Caimi, Cassina, De Padova, Gervasoni, Luceplan, Nemo, OY Light, Pomellato, Valenti, Zumtobel. He eventually became co-founder and CEO of Amar Collezioni, Alias, Nemo, and OY Light. From 2002 to 2008 he was National President of ADI, winning the Compasso d'Oro Career Award in 2020.

Carlo Forcolini, designer depuis 1970, représente un cas interculturel et transversal inhabituel. Ses produits ont été sélectionnés pour la première fois par Gio Ponti pour Domus en 1971. Après une brève collaboration avec le studio des frères Castiglioni et une longue activité professionnelle avec Vico Magistretti, il commence à travailler comme designer de produits pour Alias, Amar collezioni, Artemide, Caimi, Cassina, De Padova, Gervasoni, Luceplan, Nemo, OY Light, Pomellato, Valenti, Zumtobel. Il devient finalement co-fondateur et PDG d'Amar Collezioni, Alias, Nemo et OY Light. De 2002 à 2008, il a été président national de l'ADI, remportant le prix Compasso d'Oro pour l'ensemble de sa carrière en 2020.

Carlo Forcolini, Designer seit 1970, stellt einen ungewöhnlichen interkulturellen und funktionsübergreifenden Fall dar. Seine Produkte wurden 1971 erstmals von Gio Ponti für Domus ausgewählt. Nach einer kurzen Zusammenarbeit mit dem Studio der Gebrüder Castiglioni und einer langen beruflichen Tätigkeit mit Vico Magistretti begann er als Produktdesigner für Alias, Amar Collezioni, Artemide, Caimi, Cassina, De Padova, Gervasoni, Luceplan, Nemo, OY Light, Pomellato, Valenti, Zumtobel zu arbeiten. Schließlich wurde er Mitbegründer und Geschäftsführer von Amar Collezioni, Alias, Nemo und OY Light. Von 2002 bis 2008 war er nationaler Präsident der ADI und gewann 2020 den Compasso d'Oro für sein Lebenswerk.

Gabi Peretto

Gabi Peretto, designer e architetto italiano, all'inizio della sua carriera ha collaborato con alcuni studi di architettura e design, come lo studio Andrea Branzi a Milano e il Tamra Studio a Nagoya, in Giappone.

Nel 1998 ha fondato Omikron Design Milano, un'azienda di illuminazione per la quale ha progettato le collezioni più significative. In seguito, ha collaborato con Lucitalia, Danese, Fontana Arte, Roche Bobois, Nemo e Cassina.

Per Gabi, il design non è solo un processo creativo, ma un salto fondamentale nel futuro, un atto di previsione e sperimentazione che prende forma nella progettazione di scenari innovativi per la vita quotidiana.

Gabi Peretto, an Italian designer and architect, began his career collaborating with several architecture and design studios, such as Andrea Branzi's studio in Milan and Tamra Studio in Nagoya, Japan. In 1998, he founded Omikron Design Milano, a lighting company for which he designed the most significant collections. Afterwards he cooperated with Lucitalia, Danese, Fontana Arte, Roche Bobois, Nemo, and Cassina.

For Gabi, design is not just a creative process, but a fundamental leap into the future, an act of foresight and experimentation that takes shape in the design of innovative scenarios for everyday life.

Gabi Peretto, designer et architecte italien, a collaboré au début de sa carrière avec plusieurs ateliers d'architecture et de design, tels que l'atelier Andrea Branzi à Milan et le Tamra Studio à Nagoya, au Japon.

En 1998, il a fondé Omikron Design Milano, une entreprise d'éclairage pour laquelle il a conçu les collections les plus significatives. Ensuite il a collaboré avec Lucitalia, Danese, Fontana Arte, Roche Bobois, Nemo et Cassina.

Pour Gabi, le design n'est pas seulement un processus créatif, mais un saut fondamental dans le futur, un acte de prévision et d'expérimentation qui prend forme dans la conception de scénarios innovants pour la vie quotidienne.

Gabi Peretto, italienischer Designer und Architekt, arbeitete zu Beginn seiner Karriere mit mehreren Architektur- und Designstudios zusammen, darunter das Studio Andrea Branzi in Mailand und das Tamra Studio in Nagoya, Japan. 1998 gründete er Omikron Design Milano, ein Beleuchtungsunternehmen, für das er die bedeutendsten Kollektionen entwarf, und arbeitete später mit Lucitalia, Danese, Fontana Arte, Roche Bobois, Nemo und Cassina zusammen. Für Gabi ist Design nicht nur ein kreativer Prozess, sondern ein grundlegender Sprung in die Zukunft, ein Akt der Vorhersage und des Experimentierens, der in der Gestaltung innovativer Szenarien für den Alltag Gestalt annimmt.

_ Frame Collection

Frame Collection

Design G. Peretto

- Una tipologia che diventa morfologia. Gli elementi funzionali che costituiscono una lampada, come cablaggio, diffusione della luce e struttura diventano uguali, lineari, cartesiani e si assemblano formando un segno estetico. L'uso del quadrato conferisce allo spazio un carattere di ordine e razionalità.

- A style that becomes a shape. The functional elements that make up a lamp, such as wiring, light diffusion, and structure, become unified, linear, and cartesian, coming together to create an aesthetic sign. The use of the square adds a sense of order and rationality to the space.

- Une typologie qui devient morphologie. Les éléments fonctionnels qui constituent une lampe, comme le câblage, la diffusion de la lumière et la structure, deviennent égaux, linéaires, cartésiens et s'assemblent en formant un signe esthétique. L'usage du carré donne à l'espace un caractère d'ordre et de rationalité.

- Ein Stil, der zur Form wird. Die funktionalen Elemente, aus denen eine Lampe besteht, wie Verkabelung, Lichtstreuung und Struktur, werden vereinheitlicht, linear und kartesisch und bilden zusammen ein ästhetisches Zeichen. Die Verwendung des Quadrats verleiht dem Raum ein Gefühl von Ordnung und Rationalität.

FRAME QUADRO - RETTO**Ceiling lamp**

- Lampada a soffitto realizzata con profili estrusi di alluminio verniciati a polvere e schermo prismatico anti-abbagliamento. Accensione e regolazione dell'intensità luminosa avvengono tramite sensore touchless sul lato del profilo luminoso. Finitura in nero FT.

- Ceiling lamp made with powder-coated extruded aluminum profiles and an anti-glare prismatic screen. On/off and light intensity adjustment are controlled by a touchless sensor on the side of the light profile. Finish in black FT.

- Plafonnier réalisé avec des profilés extrudés en aluminium laqués et un écran prismatique antireflet. L'allumage et l'ajustement de l'intensité se font par un capteur sans contact sur le côté du profilé lumineux. Finition en noir FT.

- Deckenleuchte aus pulverbeschichteten Aluminium-Strangpressprofilen und blendfreiem Priskaschirm. Einschalten und Intensitätsregelung erfolgen über einen berührungslosen Sensor an der Seite des Lichtprofils. Ausführung in Schwarz FT.

Sakè Collection

Design G. Peretto

- Questa lampada richiama l'antico atto di illuminare, ricreando il gesto di posare una coppa di luce su una mensola. Due elementi fondamentali: un supporto a parete quadrato minimale e una coppa di metallo adagiata sulla sua superficie; un gesto ancora visibile nei templi dell'Estremo Oriente.

- This lamp echoes the ancient act of illuminating, recreating the gesture of placing a bowl of light upon a shelf. Two fundamental elements: a minimal square wall support and a metal cup nestled upon its surface, a scene still seen in temples of the Far East.

- Cette lampe rappelle l'acte ancien d'illuminer, recréant le geste de poser une coupe de lumière sur une étagère. Deux éléments fondamentaux: un support mural carré minimal et une coupe en métal posée sur sa surface; un geste encore visible dans les temples d'Extrême-Orient.

- Diese Lampe erinnert an den uralten Akt des Erleuchtens und ahmt die Geste nach, eine Lichtschale auf ein Regal zu stellen. Zwei grundlegende Elemente: eine minimale quadratische Wandhalterung und eine Metallschale, die auf ihrer Oberfläche ruht; eine Geste, die in den Tempeln des Fernen Ostens noch sichtbar ist.

SAKÈ 1 - 2**Wall lamp**

- Lampada da parete realizzata in MDF con diffusore in alluminio tornito e verniciato. Disponibile nelle versioni a mono e doppia emissione. Finitura in noce canaletto e nero opaco.

- Wall lamp made of MDF with a turned and varnished aluminum diffuser. Available in single or double emission versions. Finishes in Canaletto walnut wood and matte black.

- Applique murale réalisée en MDF avec diffuseur en aluminium tourné et peint. Disponible en versions à émission simple ou double. Finitions en noyer canaletto et noir mat.

- Wandleuchte aus MDF mit gedrehtem und lackiertem Aluminiumdiffusor. Erhältlich in Ausführungen mit einfacher oder doppelter Lichtemission. Oberflächen in Canaletto-Nussbaum und Mattschwarz.

Skylines Family

Design Ahlux

Come esili fili nel cielo tessono geometrie essenziali. Rimandano alla materia e ai suoi immensi vuoti puntellati di luce. Skylines è una famiglia di lampade a sospensione, soffitto e parete composta da sottili tubi metallici intervallati da corpi illuminanti lineari.

Like slender threads in the sky, they weave essential geometries. They refer to matter and its immense voids dotted with light. Skylines is a family of pendant, ceiling and wall lamps composed of thin metal tubes interspersed with linear light fittings.

Comme de fins fils dans le ciel, ils tissent des géométries essentielles. Ils font référence à la matière et à ses immenses vides constellés de lumière. La famille Skylines regroupe des suspensions, des plafonniers et des appliques composées de tubes en métal fins entrecoupés de corps lumineux linéaires.

Wie zarte Fäden am Himmel flechten sie essentielle Geometrien. Sie erinnern an Materie und ihre unendliche von Licht durchzogene Leere. Skylines ist eine Kollektion von Pendel-, Decken- oder Wandlampen, die aus dünnen Metallrohren besteht, welche von linearen Lichtkörpern unterbrochen werden.

SKYLINES WALL-CEILING**Wall lamp**

_ Zero Family

Zero Family

Design P. Cappello

Disegnata da Paolo Cappello, la famiglia Zero si ispira al simbolo matematico per eccellenza creando un effetto essenziale, elegante e rifinito in ogni suo dettaglio.

Designed by Paolo Cappello, the Zero family draws inspiration from the perfect mathematical symbol, creating an essential effect that is both elegant and perfectly refined in every detail.

Dessinée par Paolo Cappello, la famille Zero s'inspire du symbole mathématique par excellence, obtenant un effet qui se veut essentiel, élégant et raffiné dans les moindres détails.

Entwickelt von Paolo Cappello, lässt sich die Zero Family vom perfekten mathematischen Symbol inspirieren, um eine essenzielle Wirkung zu erzielen, die sowohl elegant als auch bis ins kleinste Detail perfekt ausgearbeitet ist.

DOPPIO ZERO M - L**Suspension lamp**

- Doppio Zero è un sistema di illuminazione che combina i vari modelli di Zero S - M - L. La lampada è disponibile nelle versioni composte da Zero S+M e Zero M+L. Sorgente LED integrata e alimentatore elettronico dimmerabile TRIAC. Disponibile nelle finiture total white, total black, total red brown e bronzo verniciato + oro champagne.

- Doppio Zero is a lighting system that combines various models of the Zero S, M, and L. The lamp is available in versions composed of Zero S+M and Zero M+L. Embedded LED source and TRIAC dimmable electronic power supply. Available in total white, total black, total red brown, painted bronze + champagne gold finishes.

- Doppio Zero est un système d'éclairage qui combine les différents modèles de Zero S - M - L. La lampe est disponible en versions composées de Zero S+M et Zero M+L. Source LED intégrée et driver dimmable TRIAC. Disponible dans les finitions total white, total black, total red brown et bronze peint + or champagne.

- Doppio Zero ist ein Beleuchtungssystem, das verschiedene Modelle der Zero S - M und L kombiniert. Die Lampe ist in den Versionen Zero S+M und Zero M+L verfügbar. Integrierte LED-Quelle und dimmbares elektronisches TRIAC-Netzteil. Farbvarianten: Total White, Total Black, Total Red Brown ft und lackierte Bronze + Champagner-Gold.

All LUMEN CENTER products that are part of the scope of the European low voltage directive BT 73/23 and consecutive amendment 93/68, meet the necessary requirements and bear the CE labeling. All dimensions are in cm unless otherwise indicated in the technical sheet. The assembly and maintenance instructions are included in the packages, as well as all certificates and warranty conditions. The indications about the materials and the finishes only refer to the main visible parts of the products. In general, the products are supplied without bulbs, unless otherwise indicated in the price list. LUMEN CENTER Italia Srl reserves the right to make any technical or formal modifications to the products contained in the catalogue, without any notice. All the data related to the bright efficiency emitted by our devices, are nominal and concerning to the specific technics of our bright sources (LED, halogen and fluorescent lamps) declared by the producer. The data of effective consumption and luminous emission, based on electric characteristics (potential differences and power supplies, dimming etc.) on physic and aesthetic of the devices (colour, material, type etc.) will be provided on customers demand.

Tutti i prodotti LUMEN CENTER che rientrano nell'ambito di applicazione della direttiva europea bassa tensione B.T. 73/23 e successiva modifica 93/68, soddisfano ai requisiti richiesti e recano la marcatura CE. Tutte le dimensioni sono espresse in cm salvo se diversamente indicato nella scheda tecnica. Le istruzioni di montaggio e di manutenzione sono incluse negli imballi, così come i certificati e le condizioni di garanzia. Le indicazioni relative a materiali e finiture riguardano solo le parti principali visibili dei prodotti. Generalmente i prodotti sono forniti senza lampadina salvo se diversamente indicato nel listino prezzi. LUMEN CENTER Italia Srl si riserva di apportare qualsiasi modifica tecnica o formale ai prodotti a catalogo senza dovere di preavviso. Tutti i dati relativi all'efficienza luminosa emessa dai nostri apparecchi, sono da intendersi nominali e riferiti alle specifiche tecniche delle sorgenti luminose (lampade a LED, alogene e fluorescenti) dichiarate dal costruttore. I dati di effettivo consumo ed emissione luminosa, basati sulle caratteristiche elettriche (tensioni e correnti di alimentazione, dimmerabilità ecc.), fisiche ed estetiche degli apparecchi (colore, materiale, tipologia ecc.), verranno fornite al cliente su specifica richiesta.
