

OVERVIEW

Proudly the Smallest and Lightest LRF System in its Class. The Miniature Advanced Rangefinder System Midrange (MARS-M) brings a precision weapon-mounted laser rangefinding capability to the user in an exceptionally small form factor. With an integrated Applied Ballistics solver, visible pointer, and Bluetooth interface to external peripherals such as the Kestrel weather meter, the MARS-M delivers >700m range performance in an affordable package weighing less than 8 oz.

USER BENEFITS

- **Ultra-compact with full-power capability:** Weighs under 8 oz and ranges targets >700m with a 905nm laser.
- **Built-in Applied Ballistics® solver:** Calculates real-time windage and elevation using gun profiles and environmental data.
- **Included Environmental Sensors:** Temperature and pressure to eliminate guesswork and increases long-range lethality.
- **Speed, Precision, and Scan modes:** Adapt to fast movers, long shots, or target discrimination.
- **First / Last / Best return logic:** Confirms target in cluttered environments like brush or glass.
- **Haptic feedback:** Vibration confirms ranging without needing to look away.
- **Integrated Bluetooth:** Interfaces to external devices such as the Kestrel Weather Meter and/or external displays
- **Display:** Auto-rotating display stays level mounted at 12, 3, 6, or 9 o'clock and adjustable LED brightness for day or night operation.
- **Glove-friendly 3-button interface:** Simple, intuitive control under pressure.
- **Remote switch compatible:** Comes with 12" or 20" cable options.
- **Built for combat:** Waterproof up to 1meter, recoil-rated, and reliable from 4°F (-20°C) to + 140°F (60°C).
- **Mounting:** MIL-STD-1913 rail interface to mount to a wide variety of weapon platforms
- **Units of Measure:** Imperial, Metric, or Mixed units
- **Single CR123A powered:** >2,000 range activations per battery.
