Envision Technology Selected to Produce Squad Aiming Laser Systems for the US Marine Corps

On February 24th, 2025, Envision Technology, LLC (Envision) was awarded a \$249M firm-fixed-price, indefinite-delivery/indefinite-quantity (IDIQ) contract by the US Marine Corps for the procurement of Squad Aiming Laser (SAL) systems, Spare and Repair Parts, Contractor Logistics Support, and Test Article Refurbishment. The work will take place at Envision's headquarters in Manchester, New Hampshire, and will continue until February 2030.

"We are proud and honored to have the opportunity to provide the United States Marine Corps with their next generation of aiming lasers," said Mark Belanger, Envision's President. "As an American manufacturer and small business, we take pride in designing and delivering innovative products to meet the needs of the Marines."

Founded in 2019, Envision Technology specializes in the development and production of advanced electro-optical and uncrewed systems for military applications. Envision operates on the principle of listening to the user's needs, developing innovative products with an understanding of those needs, and focusing on a streamlined development and manufacturing philosophy. Envision recognizes that our success depends on the mission success of our customers, and they strive to deliver cutting-edge solutions designed for real-world battlefield effectiveness.
