

An Introduction to Federal IRA Tax Credits for Electric School Buses

A conversation hosted by WRI's Electric School Bus Initiative & It's Electric! Coalition

March 19, 2024 - 12:00-1:00 PM EST

ABOUT THE EVENT

Please join WRI's Electric School Bus Initiative (ESB Initiative) for a free, educational webinar about the newly available Qualified Commercial Clean Vehicles Credit (section 45W) and Alternative Fuel Refueling Property Credit (30C) for electric school buses and charging infrastructure. School districts and other entities without tax liability who put an electric school bus or charging infrastructure into service in an eligible fiscal year may be able to claim tax credits through a provision known as direct or elective pay.

Speakers will share background on the newly available tax credits, review eligibility for school districts, introduce the filing process and walk through sample scenarios. Join the Electric School Bus Initiative on Tuesday, March 19th, 12:00-1:00 PM EST to learn how these credits can save school bus operators tens and even hundreds of thousands of dollars on school bus electrification.

This presentation summarizes proposed guidance on the elective pay provision released by the IRS on June 14, 2023. This guidance may be superseded by any changes made by the IRS upon release of the final guidance. Although every effort has been made to provide complete and accurate information, WRI makes no warranties, express or implied, to the accuracy of this summary and assumes no liability for its use. You are strongly encouraged to review the official IRS guidance or any subsequent versions of the guidance the IRS may issue.

Speakers in this session will include:

- Anthony Maietta, Environmental Protection Specialist, U.S. Environmental Protection Agency
- Tim Farquer, Superintendent and Curriculum Director, Williamsfield Schools
- Lidia Henderson, Associate, Electric School Bus Initiative at World Resources Institute

ABOUT THE HOSTS

Electric
School Bus

INITIATIVE

Established in partnership with the Bezos Earth Fund, WRI's Electric School Bus Initiative collaborates with partners and communities to build unstoppable momentum toward an equitable transition of the U.S. school bus fleet to electric by 2030, bringing health, climate, and economic benefits to children and families across the country and normalizing electric mobility for an entire generation.
