

PHIFER

Phiferglass® Insect Screening

Standard Window & Door Insect Screening

18x16 Mesh

■ This standard fiberglass screen is the mesh applied in most windows and doors. Easily fabricated, this high-quality standard mesh is the preferred insect screening in the fenestration industry.

Pool, Patio & Porch Insect Screening

18x14 Mesh

■ Pool, Patio and Porch Screen is stronger than Standard Window and Door Screen, making it the ideal screen for large openings such as screen porches, and patio and pool enclosures. Designed for applications where extra strength is desirable.

Screening to Control Tiny Insects

20x20 Mesh

■ This Phiferglass screen, also known as No-See-Um screen, is a tightly woven mesh designed to control small insects. While densely woven, this screen still allows good ventilation and visibility and provides some daytime privacy.
