

Tip Sheet for “*These are a Few of My Favorite Things*”

by Cannizzaro Creations

Lite Steam-A-seam 2 Tips:

Throughout this project we have used Lite Steam-A-Seam2. You are welcome to use whatever fusible web you are comfortable with, following the manufacturer’s instructions.

We have created videos showing helpful tips to get you started using LiteSteam-A-Seam2. You can access these videos from our website, www.CanQuilt.com/bom

- Notice that this fusible web has paper on both sides – it doesn’t matter which side you choose to trace on.
- If you are using your printer, print on the side with the grid.
- When you are ready to place your applique piece down, remove the paper from the side **without** the traced image.
- Once you remove the paper without the traced image, using your hands, press the sticky side of the Steam-A-Seam to the wrong side of the fabric and smooth it out. You do not have to iron until you are finalizing your block.
- Steam-A-Seam is repositionable (until it is ironed down). This makes it easy to arrange the piece of the block.

Pattern Tips:

- The same sashing fabric is used in Months 1 and 5. The total amount of sashing for both blocks is 1 Yard.
- If the background fabric is directional, pay attention to the width and height in the instructions.
- The patterns are printed in mirror image. Once you trace the image onto paper side of the fusible web and fuse to the back of your fabric, the design will be correct.
- The pattern includes all of the pieces required for each block. Trace all on to paper side of the fusible web. If you prefer, print the patterns on printable sheets of LiteSteam-A-Seam2.
- When you are ready to sew your decorative stitches, it may be helpful to use a stabilizer on the back of the block. We like Pattern Ease by HTC, but you can also use a simple piece of paper. This will keep the stitches from becoming distorted.

Kit info

- The kit includes all of the items needed to complete your block.
- In Months 1, 3, 4 and 5, the pattern instructs the maker to fuse two pieces of white fabric together to prevent shadowing. The white fabric included in the monthly kit has been fused for you. Therefore, the number of pieces of LiteSteamASeam2 in Months 1, 3, 4 and 5 has been adjusted.
- Some slight fabric substitutions may occur.
