longest industry experience**

□ **GIOMATIC VI**

It is a 6 at time 200X200X500 mm block machine

The packing is based on vertical mold vibration and is the top on the market for medium and high volume of hollow products as blocks and similar

The machine has been designed to efficiently operate with lightweight aggregates

GIOMATIC.5

It is a 5 at time 200X200X500 mm block machine

Can be supplied with mold vibration system or vibration table concept

The quick mold change and the possibility to install it on existing foundations, it makes the perfect choice for plants revamping that require improvements in reliability, products quality, and low operating costs.

PAVERMATIC

Pavermatic is a large board machine based on vibration table technology. All the cycle parameters are adjustable from the operating console and can produce products with heights ranging from 25 to 300 mm.
