Night**

**Birthday**

**Reunion's**

**Graduation**

**T. S. WE POUR 2**

The wheel is divided into a number of equal segments separated by spokes or pins. Each segment is associated with a number. The wheel is spun by a dealer, and the winning segment is indicated by a pointer mounted on a flexible piece of [rubber](#) or [leather](#), which also rubs against the pins to impart friction and slow the wheel down. Should the player stop the wheel, the segment at the top is the winner. You make any dollar amount bet you choice.

## 30" Dice Game

### PLEASE NOTE

The symbols on the wheel represent some of the 216 possible combinations of three dice. Sometimes the same combination appears in more than one segment. Players wager on the numbers 1 through 6. If the number appears on one of the dice in the winning segment, the dealer pays at 1 to 1; on two of the dice, 2 to 1; on all three of the dice, 3 to 1.

**LOW COST,  
HIGH PROFIT!**

## 30" Roulette Wheel

In the game, players may choose to place bets on either a single number, various groupings of numbers, the colors red or black, whether the number is odd or even, or if the numbers are high (19–36) or low (1–18). The winnings are then paid to anyone who has placed a successful bet.
