### 3.1 Mission w Action Statement

As an individual the future goal and mission is to be able to acknowledge what my abilities will be and be familiarized in the graphic design occupation. Life is worth a lot and I want to know what my purpose in life is and be certain that my journey now is all good. Balancing my art life with the graphic designer's life, it must be feasible to combine both to the field of graphic design. Taking the risks like thinking outside of the box to create and get the products out in the world is a must to become great at what is appreciated in becoming a leader in the industry. Practice makes a great designer and patience will be my best asset to this field.

After completing the graphic design degree program at Full Sail University my action plan will be to be confident and Diligent in this profession. I want to paint 25 paintings by summer time this year that are of the fine art quality that galleries want. I can accomplish this goal by staying organized and have a weekly planner to go by. My resilience will be shown by being able to spring back when a project is difficult and tough, future employers will see that and it will be significant in what they are looking for in a leader for their company. I will learn by mistakes, and identifying having do overs is part of the process, and these are true to the realism of life because life is not made on perfection, there is a process to making something great. In my degree I want to network with fellow peers that are in the process of completing and peers that are just about completed, it would be awesome to be mentored by a professional at Full Sail in the graphic design field. I will have the commitment to working hard and confident in what I do. Networking in the International Association of women is a site I will become a part of in my action plan.

I chose to post this mission Action Statement on my website because it is my portfolio of what I do and my accomplishments, and I can network my personal site to LinkedIn, Instagram etc.
