To Whom it may concern:

RE: Shine Electrical Engineering reference

Shine Electrical Engineering has been working with Essig Pools for approximately 20 years. They do most of our new swimming pool electrical work which includes: Panel installations, equipment hook up, home runs, relocate service lines, upgrade panels, etc. They probably average 130 pool projects with us each year. During this time we have found them to be very accommodating, responsible, and professional. We continue working with them and plan on doing so into the future.

Feel free to contact me if you have any questions.

Sincerely,

Ed Rodriguez
General Manager V/P
