A fast learning and intuitive software engineer. Combining proficiency in programming languages with three years of experience performing investigations of personnel requiring government security clearances; and experience in the service industry. Able to identify relevant problems and solve them in a timely manner.

Skills

- Languages & Frameworks: Python, JavaScript, Node, Express, React, HTML, CSS, Bootstrap
- Management & Deployment: Git, GitHub, Heroku, Command Line
- Databases: SQL, PostgreSQL, MongoDB
- Proficient in FWS, PIPS, Microsoft Word, Excel, PowerPoint

Education

General Assembly   *April 2021- July 2021*

Full-time, 500+hour full-stack Software Engineering Immersive program. Learned to build full-stack applications from the ground up using key languages and frameworks. Managed the design and development of multiple individual and group projects, including:

- Connect Four: a web application allowing two players to play against each other. Created using HTML, CSS, and JavaScript.
- CookBook: a full stack CRUD application where people can post their cooking recipes. Created using Node, Mongoose, Express and EJS.
- Our Favorite Stuff: a group project with three others building a full MERN stack application where people can post their favorite songs and movies. Created using a third party API, Git commands, React, and Mongoose.
- NextFlick: an app where people can go on and recommend shows or find their next one to watch. Created using Flask, React, React Router, React Context, PostgreSQL, and Heroku.
