

## *Evaluation*

- *Core battery-\$600 Includes a thorough evaluation of your child's phonological abilities, orthographic processing abilities, word reading, spelling and oral reading fluency skills using a variety of standardized, norm-referenced tests. An oral-language screener is also included. Your child's familial risk-factors will also be evaluated and a record review of school data will help the examiner develop an evaluation plan (parent will provide records from school). Curriculum-based measures will be utilized to pinpoint skill development in order to tailor an intervention plan for your child.*
  - *Final product-*
    - *Comprehensive report and scores tables, detailing student strengths and weaknesses*
    - *Determination of your child's risk for dyslexia based on evaluation results, including subtype*
    - *Intervention plan and recommendations specific to your child's reading and spelling abilities*
    - *30 minute follow-up consultation with parents to review report and recommendations*
- *à la carte -The following evaluations can be added to your child's core battery at the costs listed:*
  - *Dysgraphia risk assessment: identification of risk for dysgraphia, including subtype-\$150*
  - *Mathematics: evaluation of the processes underlying mathematical abilities-\$100*
  - *Cognitive abilities: evaluation of your child's overall cognitive abilities-\$200*
  - *Assessment of memory and learning: process-oriented evaluation of your child's visual memory (long- and short-term), verbal memory (long- and short-term) and working memory (visual and verbal); recommended for students who have shown "treatment resistance" in the past-\$250*
