

The Enemy: War

It's not supposed to be like this. We cannot let it continue in God's Gardens.

When a civilization starts to utilize nuclear warfare, we are headed for disaster. Please refrain from using, making and detonating bombs that cannot be easily recovered from, and cause too much damage that is hard for us to rebuild from. They are caused by putting reagents such as gun powder with an atom that they split at the last moment, which causes a huge explosion.

We must make sure that everyone stays safe from these bomb blasts, if you hear of something that might detonate, please move away as quickly as possible. We do not want to create another disaster zone. Please stop using nuclear. It is not authorized in The Universe. Please do not hurt the Universe or anything such as the life in it.

Please pray to God and he will call The Queen to do Bomb Squad for your planet. Please note that it is not allowed to create this kind of atrocity. You may not do so at any time. You will be punished for eternities.

“Oh, Dear Lord, please forgive us, we know not what we do. Please help us avoid this disaster.”

The world is not suited for warfare. Nuclear Warfare is not allowed. Please put down your weapons and resign. Once you have begun obliterating people, we must evaluate you to see if you are crazy.

Psychopaths often turn to warfare as a profession. This is so they can kill while undetected. They are often covert narcissists, and they do not know when to stop. They will keep killing until no one is left.

They say that war is often fought over three things, Religion, Land and Resources. We must come to peaceful resolutions so that this stops now. Please end the wars and terminate the bad souls.
