

# Personal Life History

## “All About Me”

My name is **Nidia** and I will be talking about my life and the goals that I have.

I grew up in a small city called **Puerto Plata** in **Dominican Republic** with all my family. I went to school and I graduated from high school. I liked to go out with my friends and share a good time. I made many good friends and I remember them with love. I was very happy living there.

When I graduated from high school, I moved to the **USA** with my mother and sister. My life in the United States has not been very easy because I had to learn another language and another culture. I met new people and made new friends, and now I live in **Lawrence, Massachusetts**. I have a job and I am studying English so I can go to college and become a dentist. I like living here because it is a country with many opportunities to be whatever you want.

I want to become a dentist because I like helping people to be able to smile and to feel good about themselves . I would also like start a Christian foundation for homeless children to help them with a better life.

In five years, I plan to have a good job like a dentist or a nurse, a family and a house where we can live.

The most important thing for me is to study in order to have a good life.

# **All about Me**

**Let me introduce myself. My name is Alina and this is my life history.**

**I grew up in Russia in a loving family. We were four in our family – my parents, my brother and I. There were hard times in Russia when I was a child, but my parents did their best so that my brother and I could have a carefree childhood. I had a lot of friends when I was a child and we had a lot of fun together. We used to spend a lot of time outside riding bicycles, running, making huts in the summer and having snowball fights in the winter. All of my best friends came from my childhood and I am still very close to them. I liked going to school, too. My favorite subjects were Russian, English and math. My father is a doctor and he worked very hard. I learned from him that I need to work hard to achieve something in my life. I graduated school with silver medal and entered Nizhny Novgorod Technical University to become an engineer. Later I also got a degree as an economist.**

**My life in the United States started 3 years ago. It was a challenge for me to change my life completely. I understand that the most basic thing I need to learn is the language. That's why I'm doing English classes and use every opportunity to improve my English.**

**In five years, I plan to get a good job. The good job for me is a job in which I could enjoy myself and where I could be helpful for other people. It would be great if I could use my experience in the IT, but it is not necessary. I hope I'll manage to find my own way here in the US very soon.**
