INSPIRE, LEARN & CREATE

FICE promotes international **cooperation** and knowledge exchange within **youth care**. FICE specifically focuses on **improving** care for children and young people in vulnerable **situations**, **worldwide**. FICE does this by organizing webinars, conferences and workshops, where experts and professionals from different countries come together to **share knowledge and experiences** and thus jointly find **solutions** to challenges in youth care.

FICE Netherlands invites you to a series of unique, international **Online Masterclasses.** In collaboration with top speakers from around the globe, we host interactive masterclasses lasting 1.5 hours. Be inspired by a 30-minute presentation, engage in small breakout rooms and share your insights during a group reflection.

Each session offers the perfect balance of **inspiration**, **learning** and collaborative **creation**. Whether you're seeking fresh ideas or looking to work on practical solutions, these masterclasses provide an excellent opportunity for personal growth. Participation is **free**, but spots are limited to 50 attendees per masterclass—so don't wait too long to register. Are you working at a FICE member organization? Then you can participate in the FICE Masterclass for **free**.

Sign up using the **QR code** and receive all insights, additional literature and a summary of the session afterwards. This is your chance to grow, learn and create alongside professionals from around the world!

How can professionals make residential youth care feel more like home?

Ymke Riemersma (Assistant Professor University of Groningen) will take us inside the daily reality of residential youth care — exploring how warmth, stability, and connection can grow even within structured settings.

Join this interactive session to exchange ideas, share experiences, and co-create new ways to strengthen the sense of belonging for young people in care.
