„EVERYTHING STARTED WITH A DREAM ...“

... shared by people with the same passion for flying. Founded in 2007, GlobeAir is now setting the benchmark in private jet charter services all around Europe. The successful recognition of its famous call sign marking more than a decade of flights performed under the visionary name of “DreamTeam”. The team today comprises 32 different nationalities and is an excellent example of a well functioning international team with a motivated crew.

Bernhard Fragner, CEO

MY PRIVATE JET

With over 50% of the market share, GlobeAir is Europe's leader within the sector of very light jets. GlobeAir is available 24/7 all over Europe with 21 private jets connecting European capitals like **London City, Geneva, Zurich, Paris, Nice, Munich, Milan** with small airfields such as **St. Moritz, Lugano, Salerno and 974 more.** As such, GlobeAir takes its responsibility towards Climate very seriously and is ready to propose an innovative way to tackle CO₂ emissions: by changing PERCEPTION.

MY GHG* CAPTURE PROGRAMS

Twenty trees and ten years are needed in Europe to capture 1 ton of CO₂ by photosynthesis. While natural capture is a wonderful tool, it is unfortunately very slow.

Methane has a shorter life in the atmosphere than CO₂, but it is the main culprit in global warming.

Even if we can drastically limit our CO₂ emissions, there will always be emissions we can't avoid. Capturing them using industrial methods is the quickest way, but it needs to be scaled to meet the requirements. Investing in industrial capture is very important for the future of our planet.

3 CARDS, 3 TYPES OF REMOVAL

It is possible to remove CO₂ or CH₄ (methane) levels from the atmosphere slowly or rapidly. Choose how quickly you want to clean the atmosphere after your trip. Our advisors will be happy to walk you through these different technologies.

MY IMPACT ON THE ENVIRONMENT

There is currently no way to fully remove GHG from the atmosphere so any flight you take will have an impact on the environment.

Do you need to fly?

If the answer is yes, it is important to choose carefully the right jet for your travel needs.

FLY YOUR WAY...

...with the Climate Jet Club Card.

Our aim is to make our members use aircraft that fit their needs so that it least impacts the Environment.

By becoming a member of our Club, you commit to a CO₂ allowance, based on your flying preferences.

Climate change and climate action are at the heart of many discussions, and we, as community leaders, cannot ignore the immense role we can play in mitigating Global Warming. The Climate JetCard is a way to raise our awareness and willingness to affect change.
