About Us

- ▶ AES FLOW CONTROLS (AES) a business unit of Mann Flow Controls, Inc (MFC) Group of Companies is a manufacturer of high quality valves and flow control products based in Houston, Texas, USA.
- ▶ AES manufactures ball valves, check valves, gate valves, globe valves, plug valves and specialty valves.
- ▶ Our valves meet API 6A, API 6D, API 594 and API 599 and API 600 specifications.
- ▶ AES is dedicated to provide our customers with high quality valves that are designed, manufactured and tested to the exacting standards of various qualifying certification bodies.
- ▶ In addition to these external certification bodies audit, AES maintain a self-auditing Quality Assurance program which provides us with identifiable goals for continuous quality improvements.
- ▶ Our QA department have emphasized on material traceability, (working with our affiliated production facilities) we conduct PMI laboratory with Optical Emission Spectrometer technology + RT-MT-.
- ▶ We believe that the integrity of materials provide for AES valves are not just in a certificate but every valves produced must pass our rigid tests throughout the manufacturing process, including a final hydrostatic test prior to shipping.
- ▶ AES offers other testing – non-destructive testing (NDT) or destructive testing may be performed to customer requirements or specifications. We work closely with established valve testing and inspection companies in Houston and around the world, conduct these additional testing required by customers.
- ▶ Our engineering department consisting valve engineers, metallurgist, valve designers and draftsperson is ready to serve our customers diverse needs and meet customer requirements.
- ▶ Whether the specification is mundane or unique, our engineering department brings a wealth of experience, knowledge and resources required to solve customer's application criteria.
- ▶ Additionally, our engineering department is able to provide design for custom and specialty requirements requested by customers.

Objective, Focus and Edge

5

When it comes to valves, we believe that your most important purchase consideration is quality, reliability, total cost of ownership and delivery. The longer a valve performs as designed and without problems, the lower the total cost of ownership. We believe our valves can compete in those terms with our competitors' in the market today.

Commitment to Customer Service

AES has affiliated strategically with various manufacturing facilities located in the USA and throughout the world, allowing us to focus on providing our customers with rapid response times for products and service needs.

Through these affiliations, we are able to provide various type of valves of various sizes and various pressure classes in virtually any metallurgy required by our customers. In addition, we are committed to significantly increasing our affiliations with many more manufacturing facilities to meet our customers' growing needs. As such, we are consistently developing and expanding the list of products and services to our customers.

Quality Control and Assurance

AES is committed to providing the highest quality products and services to our customers. This will be done without compromising our commitment to the environment, pollution prevention, or the health and safety of our greatest asset, our employees.

As a company, our management system processes is being developed by applying the latest industry techniques with a program structure in full compliance with the following standards: ISO 9001 (Quality Management Systems) and API Q1 (Specification for Quality Programs for the Petroleum, Petrochemical and Natural Gas Industry).

We always ensure that we only affiliated ourselves with manufacturing facilities in the USA and throughout the world that are certified with various quality and management processes programs with International Organization for Standardization (ISO), American Petroleum Institute (API), British Standard Institute (BS), the Europe Union's Certificate of Conformity (CE) and various quality control and assurance certification bodies throughout the world.

Objective, Focus and Edge (Continued)

When it comes to valves, we believe that your most important purchase consideration is quality, reliability, total cost of ownership and delivery. The longer a valve performs as designed and without problems, the lower the total cost of ownership. We believe our valves can compete in those terms with our competitors' in the market today.

Environmental Health & Safety

We are committed to providing a safe and healthy workplace to all employees, visitors, and contractors. Adherence to the EH&S policy is a responsibility and a condition of employment of every individual at AES.

We are continuously developing best practices, standards, and guidelines for EH&S training as required by regulation, policy, or safe job performance in a "readily understandable" format. These practices will take the form of standardized methods and acceptable criteria that facilitates learner comprehension.

Standards and guidelines will be established within the framework of an effective training program. These practices will be developed continuously where more stringent regulations, guidelines or criteria for training is available or required.

Experience, Knowledge & Innovations

The management and engineering team at AES is an innovative and forward thinking group of individuals with more than decades of cumulative experience in the industry

Our team combines seasoned veterans considered at the top of their respective fields and fresh new talent with no industry defined constraints on their thinking. This meshing of ability brings fresh and innovative solutions to an ever changing and demanding industry.

In addition, our team always keep abreast with the latest engineering and technology improvements in the industry by networking, attending seminars, conferences and trade shows and subscribing to various industry publications.

Industries Served

AES is unique in that all our valves are available in all ANSI and API pressure classes and virtually any metallurgy required. From carbon and alloy steel to stainless and exotics including titanium and zirconium, we can accommodate the most ordinary and extraordinary requirements. AES is dedicated to manufacture and supply of high quality valves in accordance with customer specifications, competitively price and delivered on time. AES manufactures gate valves, globe valves, check valves, ball valves, special service valves and other products to various industries – Oil & Gas, Petrochemical, Power Generation and Water Industries.

Oil & Gas Industry

The scale, scope and complexity of the oil and gas industry are almost incomprehensible. Words like enormous, immense and massive inadequately describe its collective activities to find, produce, transport and process the hydrocarbons the world needs for its continuing and growing prosperity. On every continent and in every ocean, the world's largest and most technologically advanced companies extract millions of barrels of oil and gas each day. AES through its people, products and services is willing to play our role in the day-to-day operational success and the future technological advancement in the oil and gas industry.

Petrochemical Industry

Valves used in the petrochemical industry are very important parts of components in the industry. Fitting the wrong valve can result in a major disaster and huge loss for petrochemical companies. AES believes that our valves, products and services are able to deliver value to the petrochemical industry while handling some of the world's most hazardous and corrosive chemicals. Providing valves, products and services that define chemical industry standards, we deliver maximum value and dependability to our customers safely and reliably. We want to help our customers exceed their business goals through the use of our valves, products and services for the petrochemical industry.

Industries Served (Continued)

Power Generation Industry

Although non-hydro renewable energy will grow faster than any other primary energy source, most electricity is generated by conventional gas and coal-fired power plants. Product characteristics are getting more complex and severe as these fossil-fueled power stations continue to change technology, reduce emissions and improve efficiency. AES's portfolio of valves are able to help optimize and control critical systems used by power producers and manufacturers of turbines and utility boilers in power generation industry by offering a wide range of solutions built to their specifications. Our valves can be used in the various types of plants such as conventional, hydroelectric, geothermal, solar thermal and bio gas power plants.

Water Industry

The water industry provides drinking water and wastewater services (including sewage treatment to residential, commercial, and industrial sectors of the economy). The modern water industry operates sophisticated and costly water and wastewater networks and sewage treatment plants, and typically consumes 1-2% of GDP. It is expected that the water industry will continue to grow as it faces supply and demand challenges related to global population growth, increased consumption and urbanization. AES plans to take advantage of this growing water industry by bringing together the best-suited products from our valves and products portfolio to tailor a complete solution that fits our customers' individual needs.

Products - Summary

9

- ▶ AES provides a wide selection of valves meeting the flow control requirements of the oil & gas, petrochemical, power generation and water industries. Depending on the need, AES is looking forward to help our customers in any way possible to meet their valve procurement efforts. Our valves are designed, manufactured and tested in accordance with API, ANSI and ASME requirements. Please refer to our Specification Conformance list for the most important applicable standards. In addition, our valves may be produced with other standards according to customer request.

- ▶ AES manufactures standard and specialty valves, including:

- ▶ Ball Valves
- ▶ Butterfly Valves
- ▶ Check Valves
- ▶ Gate Valves
- ▶ Globe Valves
- ▶ Plug Valves
- ▶ Specialty Valves
- ▶ Wellhead Equipment and Christmas Tree

- ▶ Valve Trim

The materials that we used in our valves depend on the industry served and customer specifications include the followings:

- ▶ Stainless Steel and Carbon Steel
- ▶ Aluminum Bronze
- ▶ Cast Iron and Ductile Iron
- ▶ Duplex and Super Duplex
- ▶ Hastelloy, Incoloy, Inconel, Monel™
- ▶ Tantalum, Titanium and Zirconium

- ▶ Size, and Pressure Rating

- ▶ Valves' size range from 2" to 40" (DNS 50MM to 2000MM)
- ▶ Working pressured are rated from ANSI Class150 to ANSI Class 4500
- ▶ Working pressured are rated from API 2000 PSI to API 20000 PSI.

Products – Summary (Continued)

10

▶ Temperature And Service Condition

The working temperature conditions range from record setting low temperature valves to high temperature valves used in the most critical services where high temperature conditions exist. Below are the list temperature and service conditions we offer in our valves:

- ▶ Corrosive Service
- ▶ VSP erosive (slurry) Service
- ▶ High Temperature
- ▶ Low Temperature (-46 Degree Celsius)
- ▶ Cryogenic Service (-196 Degree Celsius)
- ▶ Underground Service
- ▶ Low maintenance valves.

▶ Valve Design

AES offers valve design services to our customers in our focus and commitment to support all aspects of valve industry. Through affiliation with our partners, we have the capability to design and develop valves in accordance with recognized worldwide standards – API, ASME, ASTM, EN, ISO, NACE, BSI, MSS & PED and according to customer specification. Our technical ability and experience means that we can find the right solution for our customers.

▶ Valve Design and Field Service

We offer field service capabilities including:

- ▶ Actuation adaptation
- ▶ Alignment
- ▶ Diagnostic evaluation
- ▶ Emission containment,
- ▶ Engineering & hot tap modification
- ▶ Hydraulic field testing
- ▶ Repair
- ▶ Limit switch installation
- ▶ Inspection and maintenance.

Products – Ball Valves

11

Flanged Ball Valve

Forged Steel Ball Valve

Cast Steel Ball Valve

▶ Type

AES has the capabilities to produce any type of ball valves a customer requires. In addition, we offer ball valves that meets:

- ▶ API 6D – Pipeline Ball Valves
- ▶ API 6A - Wellhead Ball Valves

▶ Operation

- ▶ Bare Stem
- ▶ Handwheel
- ▶ Lever
- ▶ Gear
- ▶ Actuator

▶ Body Style

- ▶ Single Body
- ▶ Two Piece Body
- ▶ Three Piece Body
- ▶ Split Body
- ▶ Top Entry
- ▶ Welded Body

▶ Bore Style

- ▶ Full Port (Full Bore Ball Valve)
- ▶ Reduced Port (Reduced Bore Ball Valve)
- ▶ V Port
- ▶ Trunnion Mounted
- ▶ Floating
- ▶ Cavity Filler

▶ Design

- ▶ Three-Way Design
- ▶ Four-Way Design

Products – Ball Valves (Continued)

Fully Welded Ball Valve

Duplex SS Ball Valve

Up to 24"	Yes	Yes	Yes	Yes	Yes		
Up to 48"	Yes	Yes	Yes	Yes			

► Materials

- Body: Available in WCB, LCB, LCC, WC6, WC9, C5, C12, CF8, CF8M, CF3, CF3M, CF8C, CN7M, Inconel, Duplex, Super Duplex, etc.
- Seat: Options of metal seated and soft seated

Products – Butterfly Valves

13

Wafer Butterfly Valve

Lug Butterfly Valve

Flange Butterfly Valve

Type

AES offers following type of butterfly valves:

- ▶ Wafer/Lug Butterfly Valves
- ▶ Flanged Butterfly Valves
- ▶ Concentric Butterfly Valves
- ▶ Double Eccentric Butterfly Valves/
High Performance Butterfly Valves/
Double Offset Butterfly Valves
- ▶ Triple Eccentric Butterfly Valves/
Triple Offset Butterfly Valves

Double Flange Butterfly Valve

Concentric Double Flange
Butterfly Valve

▶ Size & Pressure Rating

- ▶ Size : 1.5"~48"
- ▶ Rating : 125~250 LB

▶ Materials

- ▶ Body & Disc: Available in Cast Iron, Ductile Iron, Carbon Steel, Stainless Steel, Alloy Steel, Duplex SS
- ▶ Seat: Available in EPDM, NBR, PTFE, Viton™, Neoprene™, NR, Heat-Resistance Rubber, etc.

Products – Check Valves

Lift Check Valve

Pressure Seal Check Valve

Swing Check Valve

► Type

We offer various types of check valves that customers require. In addition, we offer check valves that meet API 594, API 600, API 6D and API 6A.

Our extensive line of check valves are as follows:

- Ball Check Valves
- Pressure Seal Check Valves
- Diaphragm Check Valves
- Swing Check Valves/Tilting Disc Check Valves
- Stop-Check Valves
- Lift-Check Valves
- Wafer Check Valves

Wafer Check Valve

► Size & Pressure Rating

Up to 24"	Yes	Yes	Yes	Yes	Yes		
25"	Yes	Yes	Yes				
26"	Yes	Yes	Yes				
Up to 36"	Yes	Yes					

► Materials

- Body: Available in WCB, LCB, LCC, WC6, WC9, C5, C12, CF8, CF8M, CF3, CF3M, CF8C, CN7M, Inconel, Duplex, Super Duplex, etc.
- Seat: Options of metal seated and soft seated

Products – Gate Valves

15

Pressure Seal Gate Valve

Through Conduit Gate Valve
(API 600)

Parallel Slab Gate Valve
(API 6D)

▶ Type

AES has the capabilities to produce any type of ball valve a customer requires. Our extensive line of gate valves as follows:

- ▶ Parallel Slide Gate Valves
- ▶ Pressure Seal Gate Valves
- ▶ Wedge Gate Valves
- ▶ Expanding Gate Valves
- ▶ Geothermal Gate Valves

In addition, we offer gate valves that meet:

- ▶ API 6D – Pipeline Gate Valves
- ▶ API 6A - Wellhead Gates Valves

Forged Steel gate valve

▶ Stem

- ▶ Rising Stem
- ▶ Non-Rising Stem

▶ Bonnet

- ▶ Screw
- ▶ Union
- ▶ Bolted Bonnet
- ▶ Pressure Seal Bonnet

▶ Flange

AES offers gate valves that may have flanged ends which are drilled according to pipeline compatible flange dimensional standards.

Products – Gate Valves (Continued) 6

API 6A FC Type Manual Gate Valve

API 6A Expanding Gate Valve

API 6A Gate Valve (Flange End)

▶ Size & Pressure Rating

SIZE	API PRESSURE RATING (PSI)					
	2000	3000	5000	10000	15000	20000
1-13/16"	Yes	Yes	Yes	Yes	Yes	Yes
Up to	Yes	Yes	Yes	Yes	Yes	Yes
14"	Yes	Yes	Yes	Yes	Yes	Yes
16"	Yes	Yes	Yes	Yes	Yes	

▶ Materials

- ▶ Body: Available in carbon and alloy + stainless.
- ▶ Seat: Options of metal seated and soft seated.

▶ API 6A Gate Valves:

- ▶ We offers Manual Gate Valves, Expanding gate Valves, Flange End Gate Valves and FC (Cameron) gate Valves
- ▶ Size: Size according to API from 1-13/16" to 16"
- ▶ Working Pressure : 2,000~20,000psi
- ▶ Material Class: AA,BB,CC,DD,EE,FF,HH
- ▶ Working Temperature: PU,LU
- ▶ Specification Level: PSL:1 to PSL-4
- ▶ Performance Requirement: PR-1 and PR-2

Products – Globe Valves

T-Pattern Globe Valve

Y-Pattern Globe Valve

Angle Globe Valve

Pressure Seal Globe Valve

► Type

We offer the following type of globe valves:

- T Pattern Globe Valves
- Angle Pattern Globe Valves
- Y Pattern Globe Valves
- Pressure Seal Globe Valves

In addition, we offers globe valves that meet:

- API 6D
- API 6A

Globe Valve

► Size & Pressure Rating

SIZE	ANSI CLASS						
	150	300	600	900	1500	2500	4500
2"	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Up to 10"	Yes	Yes	Yes	Yes	Yes	Yes	Yes
12"	Yes	Yes	Yes	Yes	Yes		
Up to 18"	Yes	Yes	Yes				
Up to 24"	Yes	Yes					

► Materials

- Body: Available in WCB, LCB, LCC, WC6, WC9, C5, C12, CF8, CF8M, CF3, CF3M, CF8C, CN7M, Inconel, Duplex, Super Duplex, etc.
- Seat: Options of metal seated and soft seated

Products – Plug Valves

Worm Gear Plug Valve

Eccentric Plug Valve

Orbit Plug Valve

3-Way Plug Valve

▶ Type

AES offers the followings plug valves:

- ▶ 2-Port Valves or 2-Way Plug Valves
- ▶ 3-Port Valves or 3-Way Plug Valves

In addition, we offers plug valves that meets:

- ▶ API 599
- ▶ API 6D – Pipeline Plug Valves
- ▶ API 6A - Wellhead Plug Valves

Pressure Balance Plug Valve

▶ Pattern Version

Our plug valves are available in three versions:

- ▶ Short Pattern
- ▶ Regular Pattern
- ▶ Venturi Pattern

API 6A Plug Valves

▶ Size & Pressure Rating

PATTERN	ANSI CLASS					
	150	300	600	900	1500	2500
SHORT	2"-12"	2"-12"				
REGULAR	6"-12"	6"-24"	2"-10"	2"-10"	2"-12"	2"-12"
VENTURI	2"-12"	2"-24"	6"-24"	6"-16"	6"-12"	

▶ Materials

ASTM A216 WCB, ASTM A351 CF8M, ASTM A216 WCC, etc - according to ASME B16.34

▶ Operations

Plug Valves can be equipped with a gear operator, a pneumatic or electric motor actuator

Products – Specialty Valves

19

Emergency Shut-down Valve

Top Entry Ball Valve

Rotary Control Valve

Choke Valve

► Type

Below is an overview of some of the non-standard type valves that we offer:

- Wafer Valves
- Thru-Conduit Valves
- Angle Valves
- Y-pattern Valves
- Pressure-Seal Bonnet Valves
- Multi-Port Valves
- Knife Gate Valves
- Emergency Shut-down Valves (ESD Valves)
- Non-Slam Piston Check Valves
- Nozzle Check Valves
- Full Port Plug Valves
- Flood Valves
- Sub-Sea Service Valves
- Fully Welded Body Valves
- Top Entry Ball Valves
- High Temperature Switching Valves
- Cryogenic Service Valves
- Rotary Control Valves
- Surface Safety Valves (SSV Valves)
- Valve with Ball Screw
- Valve with Gearbox
- Adjustable Choke Valves
- Positive Choke Valves

Nozzle Check Valve

Gearbox Butterfly Valve

Ball Screw Gate Valve

Welded Body Ball Valve

Knife Gate Valve

Products – Wellhead Equipments & Christmas Trees

Christmas Tree

Multi Bowl Wellhead Assembly

Choke & Kill Manifold

► Type

Below is an overview of some of the non-standard type valves that we offer:

- Casing Head Assembly
- Casing Head Body
- Casing Hanger
- Casing Head Tool
- Tubing Head Body
- Casing Secondary Seal Ring
- Tubing Hanger
- Multibowl Wellhead Assembly
- Wellhead Tools
- Dual Completion Wellhead
- Unihead
- High Pressure Oil & Gas Wellhead
- PCP Wellhead
- Gas Wellhead Equipment
- Drilling Choke
- Choke Manifold
- Choke and Kill Manifold
- Combination Manifold
- Mud Manifold
- Mud-Gas Separator

Casing Head

Casing Spool

Christmas Tree Cap

Hammer Union

Tees and Crosses

Facilities

AES is based in Houston, Texas, USA – the energy capital of the world. This HQ accommodate Sales and Marketing, Projects, Engineering & Technical S, QA, Procurements, Administrative & HR, and Finance departments of MFC Group of Companies. This HQ is close to the new ExxonMobil campus in Spring, near The Woodlands.

As part of our business strategy, in order to be competitive, and similar to other companies in the US, we have affiliated strategically with various manufacturing facilities located in the USA and throughout the world, allowing us to focus on providing our customers with rapid response times for products and service needs. Through these affiliations, we are able to provide various type of valves of various sizes and various pressure classes in virtually any metallurgy required by our customers.

Head Office

Fax No. : +1 800-839-4506
Email : info@aesflowcontrols.com

Specification Conformance

22

Our valves are designed, manufactured and tested in accordance with API, ANSI and ASME requirements. The following list contains the most important applicable standards. AES valves may be produced with other standards on request.

ANSI – American National Standard Institute

B 1.20.1	Pipe threads, general purpose.
B 16.5	Steel pipe flanges and flanged fittings.
B 16.10	Face-to-face and end-to-end dimensions of ferrous valves.
B 16.25	Butt welding ends.
B 16.34	Steel valves-flanged and butt welding ends.

API – American Petroleum Institute

API Spec. Q1	Specification for quality programs for petroleum, petrochemical and natural gas industry
API 6A	Specification for wellhead & christmas tree equipment
API 6D	Specification for pipelines valves
API 6D-SS	Specification for subsea pipeline valves
API 598	Valves inspection and testing
API 6FA	Fire test for valves
API 607	Fire test for soft seated

ISO – International Organization for Standardization

ISO 9001	Quality systems-model for quality assurance in design, development, production, installation and servicing.
ISO 15156	Materials for use in H ₂ S containing environments in oil and gas production.

MSS – Manufacturers Standardization Society

SP 6	Standard finishes for contact faces of pipe flanges and connecting-end flanges of valves and fittings.
SP 25	Standard marking systems for valves, fittings, flanges and unions
SP 55	Quality standard for steel castings.

NACE – National Association of Corrosion Engineers

MR0175	Sulfide stress cracking resistant metallic materials for oilfield equipment
MR0103	Materials resistant to sulfide stress cracking in corrosive petroleum refining environments.

Past Experiences

The personnel of AES combines seasoned veterans considered at the top of their respective fields and fresh new talent with no industry defined constraints on their thinking. The list shown below are the projects of which our personnel had been involved either in terms of sales or manufacturing.

YEAR	COUNTRY	CUSTOMER	VALVES SUPPLIED

Distribution Networks

Our valves are distributed through our agents worldwide.

As part of our business strategy to increase revenue and market visibility of our valves worldwide, we are currently accepting applications from interested parties who want to become our agents. It is expected that our agents will operate in a designated territory or territories to market our valves within them. Our agents are remunerated on a commission basis for any of our valves either purchased from us, engineered in or installed into agent's territory or territories.

We place an important decision on finding and supporting the right agent in the designated territory/ies. Generally, we consider that ability to generate sales is the most important factor in our decision in selecting our agents. Of course, we also consider other factors in our decision in appointing our agent. We acknowledge that many of the ideas for valve innovation, or focus on a particular industry, in a particular territory are driven by the expertise and feedback of our agents and customers.

Our agency program is designed to support agents to sell specialized and customized valves into industries we served. To this end, we plan to provide regular training, trade fair participation, customized drawings and schematics, brochures and case studies. In addition, our experience engineer and marketing person will also support our agent to close sales if necessary.

Please contact us at agency@aesflowcontrols.com if you are interested to become our agent.

Contact Us

32

We are committed to providing you with the highest level of customer support, including responding to your questions in a timely manner. How well we do this depends on a clear, current understanding of your needs and preferences.

We encourage you to send your questions and requests, share your valuable opinions and experiences by contacting us at the followings:

Export Regulations

- ▶ If you export or re-export any product purchased from AES FLOW CONTROLS, you are responsible to ensure compliance with the Export Administration Regulations available at www.bis.doc.gov. If these items were exported to you: "These commodities, technology, or software were exported from the United States in accordance with the Export Administration Regulations. Diversion contrary to U.S. law is prohibited."
- ▶ Buyer agrees that it will not ship or divert for use in any country or countries any of the products identified on the face of this document, in contravention of the laws and regulations of the United States Government and the departments and agencies thereof (including without limitation shipping any product to Cuba, Syria, Iran, Sudan or North Korea), or cause or permit such shipping or diversion without appropriate license or approval of the United States Government (including without limitation shipping any product to Cuba, Syria, Iran, Sudan or North Korea).
- ▶ As part of our due-diligence exercise, our customers are always required to fill-in our Export Screening Form

Limited Warranty and Limitation of Liability

- ▶ AES warrants the products it manufactures and/or remanufactures and the services it performs to be free from defects in materials and workmanship which materially and adversely impact performance or safety under normal use and services for a period of:
 - ▶ One year after initial installation, or 18 months from invoice date for manufactured or remanufactured products, whichever comes first;
 - ▶ One year after the date services are provided (the "Work") as described in a AES service ticket or services invoice.
- ▶ Products found to be defective will be repaired or replaced, at AES option, in a timely fashion at no charge to the customer for such repair or replacement by AES.
- ▶ AES will not be responsible for product damage caused by the process service conditions or damage caused by customer misapplication or improper maintenance. AES also shall not be responsible for normal wear and tear.
- ▶ AES warrants that the services when performed will be of good quality, will be free from defects in material and workmanship, shall have been properly performed in accordance with applicable industry standards and, and shall be in accordance with any written specifications which were provided by the customer to AES and accepted by AES prior to the commencement of the Work. If customer notifies AES within 12 months after the date of service that it has discovered that any portion of the Work does not conform to the foregoing warranty AES shall, at its option:
 - ▶ promptly repair any such non-conforming work, or
 - ▶ promptly replace any such non-conforming work, or
 - ▶ provide customer with a refund or any equitable portion of the price paid for the work after an allowance for reasonable wear and tear.
- ▶ The performance by AES of the repair or replacement Work or the equitable refund, described in the previous paragraph shall constitute customer's sole remedy for any defect in the Work. **AES HEREBY EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE.**

- ▶ Buyer and AES acknowledge that if any equipment is to be rebranded (remanufactured) by AES, it is the equipment owner's sole responsibility to provide AES with any product recall notices and/or engineering bulletins received from the original equipment manufacturer ("OEM") or aftermarket service provided for the life of the equipment. Any recall notices and/or engineering bulletins must be received by AES prior to initiation of work.
- ▶ If customer fails to properly operate and maintain the product in accordance with the instructions of AES, or the original equipment supplier or manufacturer, as applicable, or if customer otherwise fails to adhere to applicable industry standards in operating and maintaining the product, customer's failure shall void the foregoing warranty.
- ▶ In no event shall AES or any of its respective affiliates be liable for direct, indirect, incidental, consequential or punitive damages arising out of, or connected with, any portion of the Work, including, but not limited to, loss of use, revenue, or anticipatory profit, or loss of production or facilities downtime.
- ▶ The foregoing is the only obligation of AES with respect to the Work and customer's exclusive remedy for breach of warranty, and is customer's exclusive remedy hereunder by way of breach of contract, tort, strict liability or otherwise.
- ▶ Any action or breach of this limited warranty or otherwise with respect to the Work must be commenced one (1) year after the cause of action has accrued.
- ▶ **THIS LIMITED WARRANTY SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF TEXAS, USA WITHOUT REGARD TO ANY PRINCIPLES OF TEXAS LAW WHICH WOULD REQUIRE THE APPLICATION OF THE LAW OF ANOTHER JURISDICTION.**
- ▶ Except for the duty to make payments hereunder when due, in no event shall AES or customer be liable to the other for any delay, cost, damage or failure resulting from a Force Majeure Event. A "Force Majeure Event" includes: Acts of God, action of the elements, warlike action, insurrection, revolution or civil strife, piracy, civil war or hostile action, strikes, acts of public enemies, application of federal or state laws, or rules and regulations of any governmental authorities having jurisdiction in the premises; acute and unusual labor, material or equipment shortages, or any other causes (except financial) beyond the control of either party. Delays due to any or all of the above causes shall not be deemed a breach of or failure to perform under this Work order.
- ▶ The termination of such Work order shall not cancel the Work, and customer shall thereupon pay AES for work done prior to such termination at the rates specified in any Work order plus any cancellation, restocking, returns, transportation or other costs or fees incurred by AES and any costs associated with the manufacture or ordering of specialty items which were ordered by AES and which cannot be returned to the provider thereof.
