Sharing in hopes of saving someone else's life... My dad died 72 hrs after receiving the Moderna jab. He was 75. He was not in perfect health, but was living a normal, productive life, cutting almost 20 acres of property, eating healthy, hanging out with his friends, golfing, and was supposed to leave for a 6 week vacation w my mom next week. He got the shot on Tuesday about 11:50am. He spent the afternoon hanging out with friends (had a few cocktails) and then cut grass for a couple hrs. That evening he was feeling achy and tired. Within 24 hrs his symptoms included nausea, vomiting, diarrhea, anorexia, back pain, dizziness, poor color, and fatigue. This continued for 2 days. He tried to drink water and stay hydrated, he was not able to eat. Thursday night he had extreme diarrhea. We also noticed he was having trouble picking up his feet to walk, he was shuffling his feet and unstable. He did not say anything to us, he thought he had a stomach bug. He had some OJ Friday morning. My mom left to run errands and when she came home at lunchtime, she found my dad, he was already gone. Basically, he was sick within hrs of the jab and dead in 72 hrs post jab. Not a coincidence.

I will tell you what happened to my Dad. He died last Tuesday. No underlying health problems and 100% fit. Day 4 after Pfizer vaccine he got double vision. It wouldn't shift so my Mum took him to A & E. CT scan of his head, showed no problems. Full MRI scan of his body showed no problems anywhere. They said his vision would improve..it didn't! He couldn't even walk straight, read or watch tv. Day of 2nd Pfizer vaccination...by the evening felt very ill..got worse as the days went on. Pains, aches that he'd never had before. Totally fit man with no heart problems or anything else. Day 4 of 2nd Pfizer vaccine, rushed to hospital not being able to breathe. By that afternoon, sedated, ventilated and on life support. Kept alive on life support for 8 days. On day 8 we were allowed to spend 2 hours with him and made the decision to turn his ventilator off. His heart was too damaged for survival they said. He took his last breath on Tuesday the day after the removal of the ventilator. Consultant said it was coincidence about him becoming ill and the vaccine. I'm not so sure. Death certificate reads total heart block and pneumonia- natural death. How? He had nothing wrong with his heart the MRI showed that! How did he get a totally blocked heart between 1st vaccine and 2nd!? 😞

Edited to add: U.K.

Jerry and I experienced the sudden tragic loss of my mother. She lost her ability to walk, stand, move, talk, eat, drink, and breathe following the Covid-19 vaccine. Her death happened so fast. I'm devastated, and I wasn't sure how to share this shocking news. This is my mother's experience, not a subject of debate anti or pro this or that. It is what has happened to my mother. Norway has stopped offering the vaccine to people 80 or over after sudden deaths post-vaccination. My mother was exactly one month from her 80th birthday, had no underlying health conditions, and like a light switch, became unresponsive.

This is my FIL 12/31/2020, first in line at a SNF, for the first dose of #Pfizer. He was there for physical therapy rehab and had no "skilled nursing needs" or underlying disease process. #2nddose was 1/20/2021, and he was scheduled for discharge to Assisted Living 1/29/2021. He passed away 1/22/2021. He wasn't the same after dose 1.

Please please everyone be cautious with your loved ones who are having the Covid 19 vaccine. We are still waiting for the post mortem for my mum but I am CONVINCED that she had a reaction to it. She was fine and well Saturday after having the vaccine at 11:20 she started feeling unwell shivering and dizzy Saturday night. Went to bed 8pm and never woke up. Please please warn your loved ones. Get them to question how it reacts to other medication. I'll never know the truth but I'm utterly convinced that's why my wonderful mum has left us so suddenly. Please don't let this hell We are in impact your life also 🙏🙏

Macomb County man, 90, dies after COVID-19 vaccine

Daniel Thayne Simpson, a retired accountant from Chesterfield Township who served in the Navy during the Korean War, got his first dose of the Moderna COVID-19 vaccine on Feb. 3.

The next day, Simpson, 90, was dead.

"He told my brother he was getting it and he had a sticker showing that he got it," William Simpson of Ann Arbor told the Free Press. But then, he stopped returning phone calls.

"We were assuming he felt tired or something and went to bed early and never woke up," William Simpson said. "My brother Dan went over as he often does at 5 in the evening the next day. ... He found my father dead."

My heart is broken. This is a pain I knew I would have to face one day and I knew it would be one of the hardest things to face. We had to say "see you later" to my dad yesterday. He was one of my absolute favorite people and he knew it. He was my best friend. He was the one I would call if I was going through something like this and I would say "Dad, what am I supposed to do" I would just call sometimes to hear his voice. I will miss his voice. He was an amazing dad and an amazing grandpa. People want to know what happened. I will tell you so you know, but we are processing through this. He got the vaccine yesterday morning, had a headache after so he laid down to take a nap and he never woke up.

So my mother was 72 years old. She received the first of the moderna vaccines. She died six hours later. She had the typical American health conditions. Diabetes heart disease hypertension. However she was stable. I spoke to her the night before at 10 p.m. and she was fine. She died early the night. This just happened on Valentine's Day.

I am sad about my mother's death today, less than 10 days from her 2nd dose of Pfizer Covid vaccine. She was a memory patient, but had been strong and active until she fell for the first time in 87 years, after the first covid vaccine and twice after the second dose.

Blowing Rock, North Carolina

The best mom and Grammy in the world slipped away from our life unexpectedly yesterday and the fact I didn't get to see her, talk to her, tell her I loved her one last time is eating me alive. She got the vaccine on Monday because she is a believer in science. Felt bad shortly after, and went into cardiac arrest yesterday morning. My dad was unable to revive her. We have an autopsy underway. The thing she thought was saving her might have killed her. If you know my mom, she is a professor @appstate the smartest women I know, she proofreads all my travel articles, she babysits my kids on demand when we travel, she took every precaution during covid and she loved her family so much. I love you so much

My mom consented to the Pfizer CV19 vaccine on 1/4/21 and passed away on 1/17/21 🥺❤️

She tested negative for covid all of 2020 and tested negative the morning of 1/12/21.

On 1/14/21 she tested positive and was moved to the skilled nursing home's covid unit. Her lungs were clear. She had a slightly elevated temperature.

A couple days after my mom received the CV19 vaccine, she stopped eating and drinking. Interestingly, her doctor was never told she received the vaccine even after she died. I was the one to give him that information 🥺

** I'm hoping to spread awareness on possible complications

originally I was going to post my excitement on my second vaccine. Don't get me wrong I took the risk because I was anxious about it covid. I also wanted to see my mom & didn't want to risk giving her covid. I didn't know that the vaccine is actually very risky for people with underlying conditions. my mom passed away on Friday... 1 week after getting her first Moderna vaccine. Her symptoms started the night she got her vaccine (seems to be exactly the same timing the rest of us start getting symptoms). She was a diabetic, had heart disease & kidney disease but all managed and not showing signs of sickness there. NIGHT one her blood sugar dropped and she passed out. We googled and it looked like in rare cases the vaccine could effect blood sugar of diabetics. Her dr told her to just change her insulin until symptoms subsided. Then her blood sugar was high for 2 days (Then it balanced). THEN she was very nauseous and throwing up for 2 days (then that stopped) THEN she had shortness of breath for 2 days. Nothing to call the ER. She thought it was vaccine symptoms that would go away. She passed Friday peacefully.

I've been on daughter bear hunt to find a pathologist that can determine the vaccine caused my moms passing. I keep hitting walls. Apparently vaccine deaths can't be traced. which is a bit of a problem you think? I reported it to VAERS which is CDC & FDA but they won't do autopsy (guessing now because vaccine is not conclusive in findings). Medical examiner is doing a covid test on mom but she was isolating until vaccine so she could see me & my girls. When I called my moms pharmacist to cancel her prescriptions he told me he'd heard of 5 others RECENTLY passing after vaccine. Families are left to pay for autopsy themselves (5k) a cause of death is normally determined based on an educated guess (who

My mom had her 1st Covid vaccine this past Thursday. She woke up at 1am today with a baseball sized bruise. Went back to bed got up around 7am. Here's some pictures of the progression that followed. Last picture was taken at 5:30pm. She did f/u with her pcp, had labs drawn, and has an u/s of her arm ordered for tomorrow. Has anyone seen anything like this happen? Arm is very swollen as

As I posted two days ago, my brother-in-law, 83 and with diabetes, got his second Pfizer vaccine the first week in February. He was hospitalized for shortness of breath and getting oxygen. Today's update: He was given a pacemaker. The official line was that the pace of his heart was not quite right, and they were unable to adjust it in the hospital, causing all this water retention. No big deal, he will be home tomorrow. But when I looked it up, that's not quite the story. When atrial fibrillation causes water retention, the indication is heart failure. Are there any medical professionals on this list who can confirm this?

I got MODERNA, 1st shot fine. After 14 hours of 2nd shot, passed out on floor. Had shaking and speech stammering. Chills, fever set in for -4 days. Very weak for days, dr. Did xrays, MRI to make sure I did not have a concussion from passing out. All came back ok. 2 days later, no improvement, another shaking stammering incident 911 called, in hospital for 4 days they could not find anything wrong. I am still extremely weak and fatigued. How long can side effects lasts?

CDC: More than 5,000 COVID-19 vaccine recipients have reportedly suffered "health impact event"

DATED: DECEMBER 30, 2020 BY SHARYL ATTKISSON — 221 COMMENTS

- Moderna reports higher risk of common side effects
- 5,052 suffered a "health impact event" as of Dec. 19
- CDC defines "health impact event" as one that renders a patient "unable to perform normal daily activities, unable to work, required care from doctor or health care professional"
- That's a rate of about 2.3% of vaccine recipients
- CDC says a severe allergic reaction, anaphylaxis, was reported
- It's impossible to know how effective the vaccines are beyond the number of days they've been given to humans.
- It's also impossible to know this soon what are the potential long term side effects, if any.

13 Israelis suffer FACIAL PARALYSIS after taking Pfizer Covid jab, amid influx of reports detailing adverse effects

16 Jan, 2021 14:52

At least 13 Israelis have experienced facial paralysis after being administered the Pfizer Covid-19 vaccine, a month after the US Food and Drug Administration reported similar issues but said they weren't linked to the jab.

Are we just now recognizing the danger of PEG? After the rollout?

Suspicious grow that Pfizer's COVID vaccine nanoparticles trigger allergic reactions

The U.S. National Institute of Allergy and Infectious Diseases (NIAID) convened several meetings last week to discuss COVID-19 shot allergic reactions with representatives of Pfizer and Moderna, independent scientists and physicians, and the Food and Drug Administration (FDA), reports *ScienceMag*.

The magazine, whose COVID-19 reporting is supported by the Pulitzer Center and the Heising-Simons Foundation, said severe allergy-like reactions in at least eight people who received the COVID-19 vaccine produced by Pfizer and BioNTech over the past 2 weeks may be due to a compound in the packaging of the messenger RNA (mRNA) that forms the vaccine's main ingredient, scientists say. A similar mRNA vaccine developed by Moderna, which was authorized for emergency use in the United States on Friday, also contains the compound, polyethylene glycol (PEG).

"PEG has never been used before in an approved vaccine, but it is found in many drugs that have occasionally triggered anaphylaxis—a potentially life-threatening reaction that can cause rashes, a plummeting blood pressure, shortness of breath, and a fast heartbeat. Some allergists and immunologists believe a small number of people previously exposed to PEG may have high levels of antibodies against PEG, putting them at risk of an anaphylactic reaction to the vaccine," the paper noted.

Meanwhile, an Israeli law firm has sent a letter Health Ministry Special Events coordinator Firas Hayek with a demand to reveal all [vaccine injuries](#) and damages before Israel can pass legislation regarding mandatory vaccination.

The Law Firm of Sachs, David, Price, and Hegdish wrote: "Testimonies from within society have accumulated of severe incidents that necessitated emergency medical care for those who vaccinated, evacuation to the emergency room, hospital stay, [or death](#) within a close time frame from the vaccination.

The COVID-19 vaccine, however, according to VAERS, shows 1 death reported per 35,000 shots or 10,000 completed vaccinations (so far), a 300-900 greater likelihood. The Center for Disease Control (CDC) maintains there is "no link" between the vaccine and the deaths.

Some of these vaccine injuries will be life-long and devastating

ARUTZ SHEVA 7
israelnationalnews.com

The coronavirus vaccine developed by Pfizer and BioNTech has apparently caused a number of side-effects not anticipated by the producers, a department manager at Sheba Medical Center in Tel HaShomer said Tuesday.

Professor Galia Rahav, chief of the Infectious Disease Unit and Laboratories at the Sheba Medical Center, spoke with Kan Reshet Bet Tuesday about the newly-discovered side-effects some people have reported experiencing after receiving the Pfizer-BioNTech vaccine.

The new side-effects range from paraesthesia – a nerve condition causing a tingling sensation or ‘pins and needles’ – to facial nerve paralysis.

“When we noticed this and spoke with [the company], they started to get reports about this,” said Rahav.

“At the beginning, they said that it was just hysterical women, but it doesn’t seem that way, because we’re seeing this with men as well.”

Prof. Rahav emphasized that the side-effects are likely temporary, and that it is not yet certain that the vaccine caused the reactions. But, she added, since the vaccine is new “we need to examine it, to learn, and to observe.”

“We’re just now learning about the effectiveness of the vaccine in real life. In real, day to day life, you learn different things. The effectiveness is a little different. When you vaccinate 2.5 million people in one shot, obviously we’re going to see different things happening.”

**Interesting that Pfizer
ignored the initial
reports of this side
effect because...

Hamilton PSW says allergic reaction to COVID-19 vaccine led to fainting, seizures and CPR

Bobby Hristova - CBC News - Posted: Dec 30, 2020 11:56 AM ET | Last Updated: December 30, 2020

Deborah Tilli, 27, says she accepted the possibility of death while suffering a severe allergic reaction after receiving the COVID-19 vaccine. She says she feared her two daughters, ages seven and four, would be left without a mother. (Submitted by Deborah Tilli)

Tilli says the paramedic checked her vitals and noticed her heart rate was high. She received a Benadryl shot and it seemed to work for a few minutes. But the symptoms returned and worsened, she says. "The supervisor from the paramedics was there and he just said 'OK, let's give her the EpiPen,'" Tilli said.

"Within a minute, I just said, 'Something doesn't feel right in my body,' and I remember just passing out and leaning over to the right."

Dave Thompson, superintendent of the local paramedic service, confirmed to CBC News that Tilli was taken to hospital in stable condition.

Tilli says when she woke up, she was told she suffered seizures and needed CPR for a brief period. She doesn't remember much during the reaction, but says one moment sticks out — accepting the fact that she could die.

"There was a moment where, I don't want to say I gave up, but I was just like 'It is what it is.' ... [Days later] when I was in bed the other night, I was thinking, 'What if I left my two girls without a mother?'" Tilli said.

Even the very young are experiencing deadly reactions

17-year-old in ICU after receiving second coronavirus vaccine dose

By JERUSALEM POST STAFF JANUARY 24, 2021 22:48

A 17-year-old was hospitalized in the Safra Children's Hospital's ICU at Sheba Medical Center a few days after receiving the second dose of the coronavirus vaccine, according to the hospital.

I'm a 21 year old CNA at a nurs home i was working and completely healthy i got told to go get the vaccine (from peer pressure bc i didn't want it) talk to a lady told her i had seizures in the past i had a cold and have allergies to shellfish amoxicillin and penicillin (SHE CROSSED THEM OFF AND PUT N/A! ON MY CONECENT FORM!) I took the vaccine at the 12:02 on Jan 8 i walk around and made my way to my seat and immediately felt my heart racing getting hot and dizzy i tried everything to calm my heart down and nothing worked i put a cold water bottle on my head and watched my Apple Watch to see how high my heart rate was it was 176 when i checked that's when i new something was wrong i stood up to get help and i just collapsed. I couldn't move after my hands and legs seemed paralyzed my left side of my face was all pins and needles feeling. They say i had two seizure like eps i was throwing up and screaming in pain. I then had two epi pens in the left leg i couldn't feel it at all Bc my legs couldn't feel anything my legs where completely numb and well paralyzed the emts came i was extremely tired and weak and hurt ER i noticed that my feet where purple we tried to plop them up they would change in color back to normal but still freezing cold and would turn purple right when i put them down. It's come to the point of painful and pins and needles feeling is worse it's been worse on the left then the right the whole time i can't walk without support and my walker and it's very painful. I went to Boston hospital to get my feet checked out since they are purple and now i need to get a biopsy done to  feet. I reported it to Pfizer and they will be calling me in the next few days i was told

Two different men both in critical condition both 36 hours after shot

My dad got vaccinated... 36 hours later he was in the hospital with heart failure. We thought we were going to lose him.

Me: Dr Cardiologist (DC), what's wrong with our dad?

DC: Well, at first he had all the symptoms of COVID, but he tested negative. Then we discovered he had heart failure.

Me: How bad was it?

DC: Your dad was very sick. We didn't think he would make it the first night.

Me: So what happened to his heart?

DC: Well, his arteries are clear and there's no blockage. So it's hard to say. We did find 2 liters of fluid we drained from his lungs that we think is secondary to the heart. And there's no infection.

Me: So what caused the heart failure and fluid in his lungs?

DC: We still don't know.

Me: Could it have been the experimental vaccine he received about 36 hours earlier...?

DC: Oh, no.

Me: Why not?

DC: There's no evidence for that.

Me: And you confirmed my dad doesn't have diabetes, metabolic syndrome or any other comorbidities, correct?

DC: Correct.

Me: So what caused him to have sudden heart failure? And what explains why he is now doing so much better?

DC: We still aren't sure.

Me: And you're sure it wasn't the vaccine?

DC: Yes.

Me: How can you be sure?

DC: It's just not.

What has to happen for something to be considered, even as an association (not causation) an adverse reaction in the reporting data?

I'm sensing things are likely not being recorded or documented accurately in the medical community.

Primary

I cared for a previously healthy patient yesterday who came in with a massive intraparenchymal hemorrhage about 36 hours after receiving his second dose of the Pfizer vaccine. Poor guy had complete left sided hemiparesis and total unilateral left sided neglect. He was vomiting secondary to the increased intracranial pressure and all he kept repeating was "I'm ok, I'm ok, I got the vaccine. I got both doses of the vaccine." Intubated, ventilated, emergency ventriculostomy, mannitol, anti-seizure meds. His prognosis is abysmal. Was it related to the vaccine? Don't you dare ask that question!!!

Wonder if he will show up in the VAERS database. I Keep up what you do. You are one of the only islands of sanity in all this.
