

# AZ-RPUCA

UNIVERSAL SUPPLY AIR DAMPER 3-WIRE POWER  
OPEN/POWER CLOSE

The AZ-RPUCA series low pressure two-position & modulating damper was developed for precise control of supply air in the HVAC duct system. Rigid aluminum components provide a strong, yet lightweight construction. The damper actuator with built-in LED lights is designed for years of care-free operation. The power/open close design guarantees precise control of supply air into each zone. Long-life nylon gears drive the opposed blades open and closed. Opposed blade design reduces turbulence in the air stream. 15 second operation to full open or closed position. A minimum open position can be set to bleed air ventilation or duct balancing. End or shaft marked with high-visibility blade position indicator. Custom sizes are available. Quick turnaround on orders. Most orders ship the same day.
