

Converge Innovation Center

The goal of the Ohio Manufacturing and Innovation Center is to provide resources and services to facilitate the growth of innovative technology manufacturing in the state of Ohio

Cultivate Resources

Build relationships with Ohio industry partners, engage economic development agencies and funding sources, utilize Ohio universities and federal research laboratories.

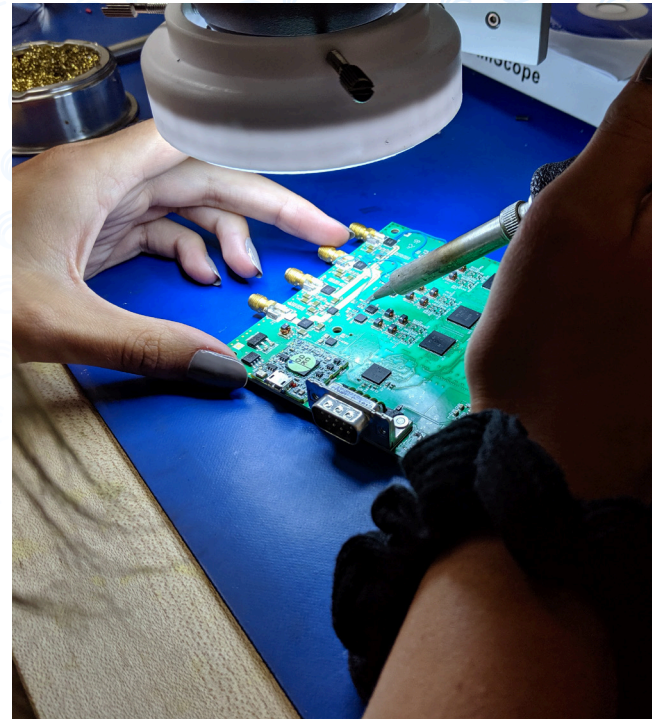

Versatile Facilities

Develop and provide access to a facility which allows for: education, experiential learning, value enhancing equipment, events, collaboration, and more.

Insightful Experiences

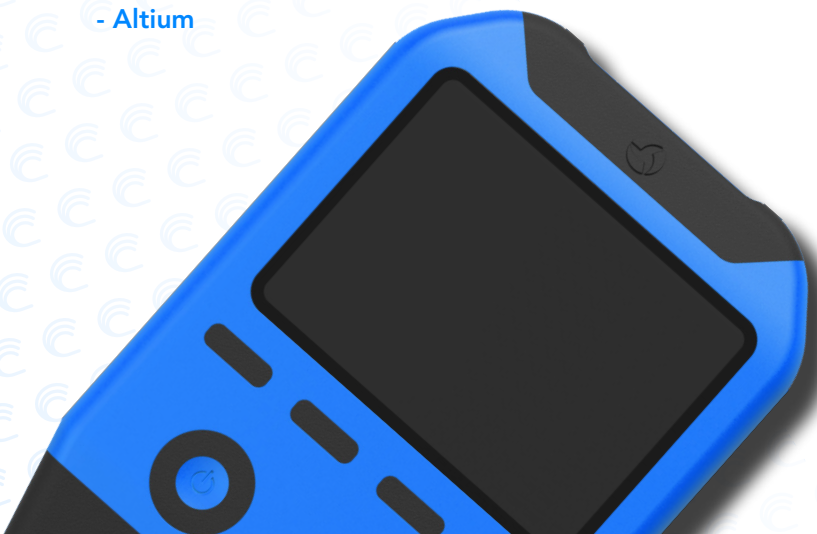

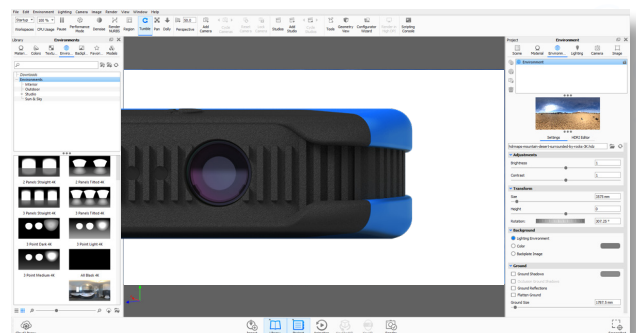

Develop meaningful partnerships between industry, academia and government to build value added programs for the manufacturing community, student population, and state of Ohio.

Softwares we employ.

We are helping our patrons and students become high value professionals partners by utilizing industry relevant software for educational opportunities:

- Solidworks (CAD)
- Fusion 360 (CAD/CAM)
- Keyshot 9
- Adobe Creative Cloud
- Altium
