Public – Private Partnership Infrastructure Project Development

An Approach based on the

iDOMO

Investment and Development Platform

As Designed by CBH Inc., Canada

October 2019

Public - Private Partnership

Infrastructure Project Development
An Approach based on the **iDOMO**

Training Course Outline

Course Introduction:

This is one of the most important PPP professional training courses that you may attend on such subject. The bearing of such importance is the novel iDOMO approach (invest, Develop, Own, Manage and Operate) for project development. iDOMO investment and development PPP platform has far greater socio-economic implications than just developing a project. It comes in an integrated package. The focus is to fulfil public needs for vital life necessities such as water and power. The end product will be a sustainable economy and growth of the middle class.

As a **Certified Professional** you are knowledgeable, qualified and eligible PPP business leader in your country and in your field.

Public - Private Partnership

Infrastructure Project Development
An Approach based on the **iDOMO**

Training Course Outline

This Course is a MUST For:

- PPP Experts and Professionals
- PPP Government Officials
- Project Managers working in the Large Scale Construction Companies
- PPP Academics and Socio-Economic Students

At the end of completing the five modules and passing the test you receive a Certified Professional Certificate with Your Name and Registration Number.

You are eligible also for a PPP update and refreshment seminar for knowledge sharing and practical case studies (within two years) for FREE.

Special Discounted Fees for Groups of Five Participants or More.
