

WATER SMART KIDS

IN
COLLIER
COUNTY

MESSAGE TO PARENTS

Welcome

The NCH Safe & Healthy Children's Coalition of Collier County has developed this guide to support your efforts in keeping your children safer around the water. Your involvement is the most important factor in helping you prevent, prepare for and cope with emergencies. The resources contained in this guide will provide you with useful tools to help make your children safer around the water and Water SMART (Safety Methods and Rescue Techniques).

Please take a few moments to review this guide, including the information about locations for water safety lessons, CPR training and safety equipment.

Drowning is the leading cause of death for children ages 1 to 4 in Collier County. For every child who drowns, four others are hospitalized for non-fatal drownings, some of these result in permanent brain injury.

For more information, visit us on Facebook, WaterSmartCollier.com or call/e-mail us at 239-624-4033 or Info@SafehealthyChildren.org.

Thank you,
NCH Safe & Healthy Children's Coalition of Collier County

Many of these certified aquatic centers listed above also offer private lessons. Additionally, some of the aquatic facilities will provide a discount towards the first set of swim lessons. Parents/caregivers must check with the aquatic facilities about these discounts and need to present this booklet at time of registration to receive discount. Contact each facility directly for more information.

Private, semi-private and small group swimming lessons:

Tenley's Aquatics, Inc. 305-814-7946 (Ages 6 months +)

Swimtastic Swim School 239-260-4926 (Ages 6 months +)

Essential Swim Lessons 239-465-8602 (Ages 6 months +)

SWIM Tutors USA 941-564-5140 (Ages 6 months +)

SWIM SCHOLARSHIPS

The **Florida Drowning Prevention Foundation** offers swim scholarships for FREE swim lessons to children & adults.

Call (239) 919-2001 for more information!

Scan the QR code on the right for the link to apply.

CHECK THE WAYS YOU CAN HAVE SAFER WATER

Remember: A child can drown in water that goes up to your ankle. There is no such thing as a safe end of the pool.

- Install alarms on all doors and windows that lead outside.
- Install locks at least 54 inches high (that's 4 and 1/2 feet or 1.4 meters) on all doors, including sliding glass.
- Keep windows locked as well or install window screens.
- If there is a swimming pool near your home, make sure a high fence goes all the way around it.
- The gate should close and latch by itself.
- Make sure everyone who cares for your child, like grandparents, neighbors or baby sitters, also have fences, locks and alarms.
- Make sure everyone who cares for your child knows about nearby water dangers such as ponds, ditches, lakes, canals.
- Keep chairs, stools and tables away from fencing so your child cannot climb over.
- Empty plastic and blow-up pools before taking your child inside. Turn empty plastic buckets or flower pots upside down so they cannot collect rain water.
- Empty or drain bathtubs as soon as bathtime is over.
- Install safety covers on all hot tubs.
- Remove ladders from above ground pools after each use. Keep chairs and tables away from above ground pools so your child cannot climb in.
- Do not let your child play near pool drains because children can get stuck on them.

Visit the National Drowning Prevention Alliance at NDPA.org, the American Red Cross at RedCross.org or the NCH Safe & Health Children's Coalition at WaterSmartCollier.co for more safety tips.

B A S I C
CPR

CALL 911

**Continue cycles of compressions and breaths until
victim shows signs of life or **AED** arrives.**

Ursus Enterprises Inc.

Ursus Enterprises Inc
703-879-5888
charts411.com

Conscious Choking Adults & Kids

- Ask the victim, "**Are you choking?**"
- If unable to make any noise send someone to **Call 911**.
- Ask the victim, "**May I help you?**"
- If the victim agrees, take a wide stance behind them.
- Place one finger in the belly button.
- With the other hand, make a fist and place it slightly above the finger in the belly button.

- Take your hand and place it on top of the fist.
- Thrust in and up.
- Each thrust is a separate attempt to get the object out.
- Repeat until object is dislodged.

If the victim goes unconscious, lay them on a hard surface and go to step 3

Conscious Choking Infants

- Place one hand on the jawbone.
- Be careful to **support the head**.
- Position the infant on your forearm.
- Ensure that the infant's head is lower than it's chest.
- Using the heel of your hand, hit the infant **5 times** between the shoulder blades.

- Place palm on skull and sandwich the victim between your forearms.
- Roll victim onto your other forearm.

- Place two fingers on the breastbone slightly below an imaginary line between the nipples.
- Compress straight down **1/3** depth of the chest (about **1 1/2 inches**) **5 times**.
- Repeat until object is dislodged.

If the victim goes unconscious, lay them on a hard surface and go to step 3

Step 1

Survey the Scene

Make sure the scene is safe for you and the victim.
DO NOT BECOME ANOTHER VICTIM

Step 2

Check for Unresponsiveness

Tap the victim on the shoulder and shout...

"ARE YOU OK?"

INFANTS: Tickle or Pinch

DO NOT HIT OR SHAKE an infant.

CALL 911 and get an AED!

Step 3

Check for breathing for **5-10 seconds** if the victim is **NOT BEATHING** or breathing abnormally
Begin **CPR!!!**

Compressions

Remove any clothes that are in the way of performing CPR or use an AED

Adult: puberty and older

- Place the heel of one hand on the center of the chest (the lower half of the sternum).
- Place the other hand on top and interlock your fingers.
- Compress straight down at least **2-2.4 inches 30 times**, at a rate of at least **100-120** per minute.
- Allow the chest to fully recoil between every compression.

Child: 1yr - puberty

- Place the heel of one hand on the center of the chest (the lower half of the sternum).
- Place the other hand on top and interlock your fingers.
- Compress straight down at least **1/3** the depth of the chest (**about 2 inches**) **30 times**, at a rate of at least **100-120** per minute.
- Allow the chest to fully recoil between every compression.

Infant: 1yr and younger

- Place two fingers on the breastbone slightly below the nipple line.
- Place the other hand on the victim's forehead.
- Compress straight down at least **1/3** the depth of the chest (**about 1 1/2 inches**) **30 times**, at a rate of at least **100-120** per minute.
- Allow the chest to fully recoil between every compression.

Airway

- **Do a head-tilt/chin-lift.** (Place one hand on the forehead and two fingers on the bony part of the chin)
- **Smaller Victims: Tilt the head less.**

Breathing

- **For adults and children** Pinch nostrils closed and give **2 breaths** so the chest rises.
- **For Infants** Seal your mouth around their nose and mouth. Give **2 small breaths**.
- **If breath did not go in, Retilt the head and retry the breath.** If breaths still don't go in,

RESUME COMPRESSIONS

After compressions, check the mouth for obstruction, before resuming breaths

AED

- Turn on the **AED** and follow the voice prompts.
- Remove the victim's shirt.
- Make sure the victim's chest is dry.
- Remove any medical patches.
- Remove any extra hair (if pads do not stick).
- Remove the defibrillation pads from their packaging.
- Look at the images to be sure where to apply the pads on the victim.
- Place pads on the victim's bare chest.
- **If NO Shock Advised** and if the **AED** advises, immediately resume compressions.
- **If Shock Advised**, after shock immediately resume compressions.
- The **AED** will prompt you to stop CPR every **2** minutes to reanalyze the heart.

CHECK THE WAYS YOU CAN HAVE SAFER KIDS

- When your child is bathing or playing in or near water, **KEEP YOUR EYES ON HIM OR HER AT ALL TIMES. NO TEXTING or TALKING ON THE PHONE.** It only takes seconds for a child to drown.
- **NEVER SWIM ALONE.** Teach your child that he must never play in water unless a grown up is watching.
- Take your child to swimming lessons. If you don't know how to swim, learn how. This booklet has phone numbers and websites for places that teach swim lessons.
- **IF YOUR CHILD IS MISSING, CHECK NEARBY POOLS AND OTHER WATER AREAS FIRST.** Remember it only takes seconds for a child to drown.

CHECK THE WAYS YOU CAN PLAN FOR A SAFER RESPONSE

- Swim only at lifeguarded public pools and beaches.
- Have a Lifeguard or designated Water Watcher at events at or near water.
- Put a U.S. Coast Guard approved life vest on all children who can't swim. Loaner life vests are now available at Sugden Park and 14 public beaches in Collier County*.
- Don't trust blow-up rings or armbands also known as floaties or water wings. These are toys. They can't keep your child safe. Use a Puddlejumper instead.
- Watch your children carefully. Lifeguards are not babysitters.
- Keep a phone near the pool, but only for emergencies.
- Never jump in the water to rescue someone. You both could drown. Call for help and reach out with something he can grab, like a pole or swim noodle, then pull him to safety.
- Make sure you, the grandparents and baby sitters are trained in CPR. This booklet has phone numbers and websites to learn CPR.
- If your car or truck ever goes off the road and lands in water, you only have seconds to get out. You do not have time to call for help. Have a tool in your car that can cut the seat belt and break the windows.

Scan this QR code to watch some short videos on how to escape a sinking car.

SAFETY DEVICES

Visit **Florida Swimming Pool Association** a Flordiapoolpro.com or **Just Against Children Drowning** for pool fencing information and installation

CPR CLASSES

To find CPR classes for infants and children, google CPR classes or check with your local fire department, hospital or American Red Cross.
