CODING YOUR NEW REMOTE TO YOUR MOTOR CONTROL BOARD

1. Access the control board of your Stagnoli automation

2. With the control board LC-Display already in the start/status menu;
   > Press the 'E' button three (3) times;

   > The LC-Display will scroll the text: 'push', indicating the system is in the learn mode

3. Take your new remote and press the button you wish to be stored for 1 second;
   > The LC-Display shows the text 'ok' indicating success

4. <u>Repeat this step twice</u> to exit programming;
   > Press & Hold for 3 seconds, then release the 'E' button
   Note: if you do nothing, after 30 seconds the Display will automatically return to the start/status menu

5. To store other remote controls, repeat from step 1

BATTERY REPLACEMENT

• If the battery is low, the LED will wink every time the button is pushed

• CR2032 3V Lithium battery

• Please replace the battery ensuring polarity (+/-) is correct

• The old battery must be disposed according to the local environmental regulations

• Electrolyte contained in the batteries is extremely irritating for eyes and skin. If you come into contact with it, wash immediately with water and consult a doctor

⚠ WARNING

KEEP OUT OF REACH OF CHILDREN
Swallowing can lead to chemical burns, perforation of soft tissue, and death. Severe burns can occur within 2 hours of ingestion. Seek medical attention immediately.
