

Solution Accelerator for Microsoft Azure Cloud Adoption

Jump-start your cloud migration journey with holistic discovery and assessment for rapid, secure, and scalable cloud transformation planning and modernization with Teton Cloud Consulting.

A unique approach to Azure adoption

Cloud migration is a complex undertaking, requiring careful planning and execution. New cloud consumers often struggle with challenges such as lack of internal resources and expertise, understanding dependencies between apps and workloads, and prioritizing apps for migration and modernization.

Teton Cloud Consulting's approach to cloud adoption starts with a clear understanding of your cloud journey leveraging Dr Migrate, Microsoft's globally endorsed Azure discovery, planning, and assessment tool, at the heart of the approach. Our holistic discovery, assessment, and planning of your technical estate is the first step to uncovering the value of cloud adoption for your organization.

Teton Cloud Consulting leverages Dr Migrate and our automated landing accelerator platform to help clients migrate and modernize successfully. Our accelerator is an automated deployment of a market-leading Azure platform. Built with Infrastructure as Code (IaC) using Terraform, it aligns with the Microsoft Cloud Adoption Framework (CAF) and incorporates established DevOps capabilities.

Automate setup & deployment

Reduce deployment time to 6-8 weeks

Migrate & modernize faster

Reduce the need for manual intervention

Scale with templated landing zones

Integrate security & compliance

Avoid overprovisioning costs

Automate planning approach through execution with Dr Migrate

Offering overview

Includes:

Phase 1

- Financial scenarios and readiness evaluation with AVS Express
- Functional discovery and migration planning with Azure Migrate and Dr Migrate
- Detailed application rationalization and migration strategy with Dr Migrate
- Definition and scope of work planning for full cloud migration journey

Phase 2

- Foundational Azure Landing Zone stand-up with Dr Migrate

Phase 3

- Migration Factory execution and modernization with Dr Migrate and Landing Zones
- Continuity Patrol licensing to be used for testing purposes only

Purpose and goals

Teton Cloud Consulting's solution accelerator approach for Azure brings clients a unique blend of expertise, automation, and security-focused execution following the Microsoft CAF. Goals include:

- **Empowering** comprehensive security at every phase
- **Reducing** time-to-value with automation and acceleration
- **Optimizing** operations and costs through comprehensive management
- **Ensuring** consistency and repeatability in innovation through as-code and DevOps support
- **Accelerating** cloud adoption by leveraging a next-generation approach

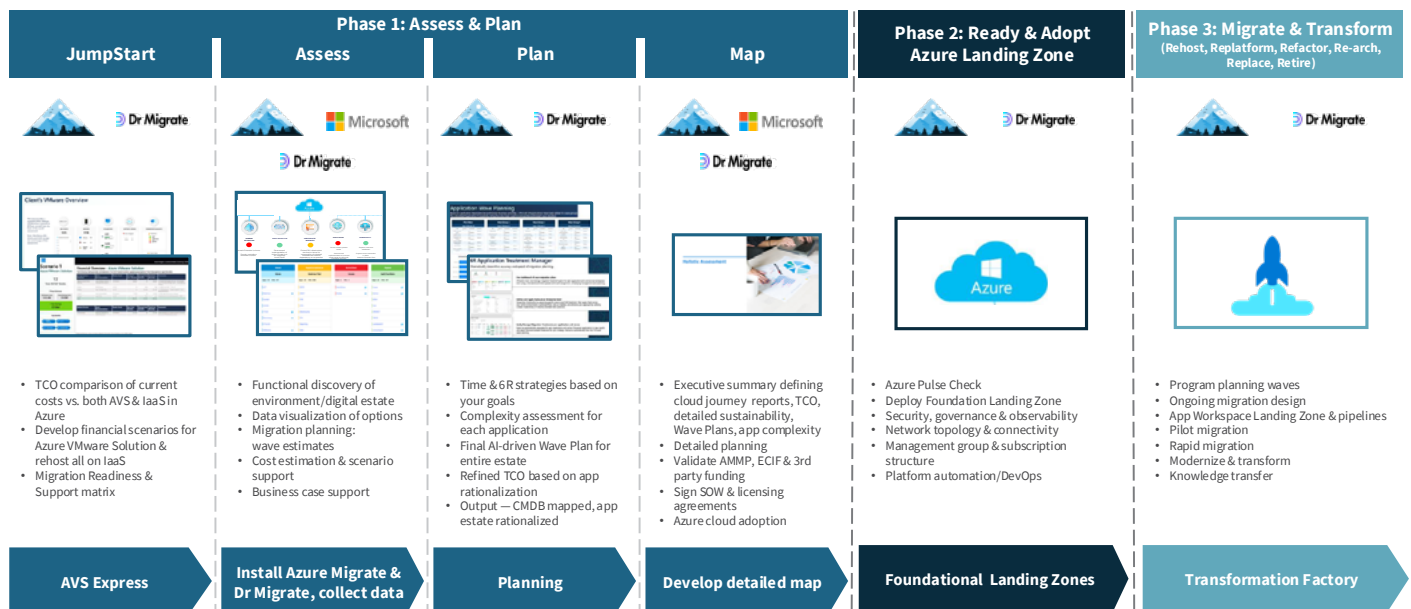

Dr Migrate product features

- Native Microsoft technology
- Real-time dashboards
- In-depth technical analysis
- Application mapping & 6R treatment
- Network inventory
- Cloud hosting
- Cost & effort projections
- Automated wave planning

Landing Zone features

- Platform DevOps & automation
- Resource organization
- Identity & access management
- Network connectivity & topology
- Management
- Security
- Governance

End-to-end Microsoft Azure accelerated cloud adoption

Success in motion: Multinational building materials company

Upon signing a \$50M Microsoft Azure Consumption Commitment (MACC), the client realized it lacked the internal expertise and resources to execute such a migration successfully to scale. Leveraging Dr Migrate to make data-driven decisions on how and when to execute Azure migration has resulted in the following benefits:

- Established Landing Zones in **3 regions**
- **Internal support** for strategic execution
- **Accelerated** migration timelines
- **Confidence** in the path forward

Where will your ambition take you? Let's talk.
