

Veterinary Student Legacy Scholarship Program

First Year Students

Summer Internship

At the end of the first year, qualified applicants can work in one of our practices as a paid intern.

The intern will rotate through all positions within the practice and upon completion will be paired with a staff member and doctor to perform technical duties within the practice.

Interns will be paid a competitive salary and furnished with living arrangements if they do not live locally. A doctor-staff-mentorship will be established to support the intern during the summer employment period.

Second Year Students

Summer Internship

At the end of the second year, qualified applicants will be chosen from the class of first year interns for a return summer employment period.

The second-year intern will be paired with a doctor and technician within the practice and will proceed along the personal development path developed prior to the initiation of the summer employment period.

Interns will be paid a competitive salary and furnished with living arrangements if they do not live locally. A doctor-staff-mentorship will be established to support the intern during the summer employment period.

Third and Fourth Year Students

Scholarship Program

Second year interns that graduate from the summer employment period can apply for a scholarship/grant for the remaining two years of veterinary school.

The scholarship/grant will pay the student \$5,000 for the junior year and \$10,000 for the senior year. The funds will not be repaid should the new graduate take a position in one of our practices and stays for one year. If the new graduate chooses to take a different position, then the funds must be repaid. Graduates that seek to do a clinical internship upon graduation are eligible for additional scholarship/grant funds.
