

Force Control

PRESSURE GAUGES

ForceControl pressure gauges for monitoring and adjusting the cutting pressure provide you with an effective and controlled process for all die-cutting tasks. The Wink pressure cells can be easily repositioned using the quick snap lock system.

Depending on machine type and application, we offer three ForceControl versions. We will be happy to advise you!

Advantages

- full die-cutting control
- cutting pressure (preload) can be adjusted with minimum effort
- extended cutting tool life
- easy-to-install quick snap locks
- pressure gauges can be rapidly repositioned when retooling equipment for a different diameter

Force Control

Overview of versions

	FC 6	FC 12	FC 15
System	mechanical		hydraulic
Positioning	stationary (fixed)		rotatable
Force range	6 kN	12 kN	15 kN
Quick snap locks	integrated		optional
