Through the “see, treat and follow up approach”.

## Statement of intent.

The Global Cancer Care and Research Institute [GCCRI], acknowledges the connection between the climate and environmental crises; the threat of current and future homelessness, disease, food and water shortages, and poverty for millions of people around the world. As well as the major damage being caused to the natural world

GCCRI therefore recognize our responsibility to reduce our carbon and environmental footprints and commit to being an environmentally responsible charity.

To achieve this we commit to the following actions:

### Our commitment.

1. GCCRI has appointed Hosameldin Elshahat to take responsibility for enacting and reporting on our commitment to becoming an environmentally responsible organization.

To ensure GCCRI has a clear idea of what we have already achieved and what still needs to be done, an annual environmental audit will be prepared and presented alongside the annual accounts that will include details of;

- Energy carbon footprint
- Electricity usage
- Water usage
- Gas usage
- Transport fuel/costs/means
- Total waste production
- % of waste recycled
- % vegetarian/vegan meals provided
- Total paper consumption
- % Recycled paper used
- % Renewable energy used
- Any other relevant environmental criteria.

2. GCCRI annual impact statement will include a summary of this annual environmental audit of the charity.

3. Progress on improvement of GCCRI environmental performance will be a standard item at senior management meetings.

4. All staff contracts will include a clause stating that staff will be expected to help GCCRI in carrying out its aim of being an environmentally responsible organization, in how they carry out their day-to-day duties.
5. Induction procedures for new staff/volunteers/members (delete as appropriate) will include information on the charity's environmental practices.
6. GCCRI will ask all our current and future suppliers for their environmental policies and for evidence of implementation of such policies and indicate that such performance will be used as criteria for supplier selection.
7. GCCRI will seek to have relevant environmental clauses included in any future contracts agreed with outside bodies.
8. GCCRI will include environmental responsibility training in any future staff training programmes.
9. GCCRI will observe existing environmental legislation as a minimum standard and seek to out-perform current legislative requirements where practical.
10. GCCRI will develop and maintain a sustainable transport policy for their staff, seeking to reduce unnecessary travel and making the transport that is necessary as sustainable as possible and will monitor progress annually.
11. GCCRI will as part of the planning, procurement and delivery of any new work commitments, projects or initiatives consider the environmental impact of any work before it is undertaken.
12. GCCRI will as part of the planning, procurement and delivery of any current work commitments, projects or initiatives review the environmental impact of any work within (insert realistic timeline/deadline to review current work commitments).
13. GCCRI will strive to become a role model for good environmental working practises and will share any knowledge and experience gained in how to achieve this, with other organizations.
14. GCCRI will examine any financial savings and investments, including pensions, to try and ensure that any investments are only used to support environmentally responsible organizations.
15. GCCRI will review any owned or rented properties or offices, to establish their carbon footprint and take measures to address any areas of improvement that are needed to achieve low or zero carbon status.

**Review:** This environmental policy shall be reviewed annually upon its adoption.

**Date adopted:** 03/JANUARY/2024

Sincerely,

DANIEL G. KIMANI.  
CEO,  
GCCRI-KENYA.

HANNAH W. MBOTE  
SECRETARY,  
GCCRI-KENYA
