

MERAKI

BEAUTY AND SKIN BAR

Post Treatment and Home care for Enzyme / Acid Peels/ Microdermabrasion

To ensure your skin care goals and to avoid any injuries or damage to your skin we at Meraki Beauty and Skin Bar ask you to follow these post treatment and home care procedures.

1. Aerobic exercise or vigorous physical activity should be avoided for the first 48 hours.
2. Direct sunlight exposure is to be completely avoided immediately following the treatment (including any strong UV light exposure and tanning beds). If some sun exposure cannot be avoided, first apply sunscreen with an SPF of 30 or greater. Sunscreen (with at least a SPF of 15) should become a part of your daily skin care regimen as your skin will become more sensitive to the sun as a result of this treatment.
3. Cleanse your face with water or a mild soap substitute

4. Gently moisturize your face using _____ a minimum of _____ times a day.
5. **DO NOT** apply any type of glycolic acid or exfoliation products as this can severely damage or irritate the skin during the entire healing process.
6. **DO NOT** peel, rub, or scratch your skin at all. This **WILL** cause damage and compromise your results as well as possibly cause severe scarring.

Additional instructions:

you experience painful areas of the face, contact your skin care therapist immediately, especially if you are prone to cold sores. Any blisters that form will need to be reported immediately. If you may have additional questions or concerns regarding your treatment or suggested home product/post-treatment care, you must consult your therapist immediately.
