

# We're SWaM Certified!

Capital Air Filters is proud to announce we are officially SWaM certified!

## What is SWaM certification?

SWaM stands for Small, Woman-Owned, and Minority-Owned Business and the certification program is administered by the Virginia Department of Small Business and Supplier Diversity (SBSD).

The purpose of the SWaM certification program is to "enhance procurement opportunities for SWaM businesses participating in state-funded projects."

Capital Air Filters is grateful for the assistance that the SBSD and SWaM certification program provides and we are looking forward to growing our business with the Commonwealth of Virginia.

Certification Number 812288
