Note: The W60B must work with the W56H handset running the firmware version 61.81.0.30 or later. We recommend you first upgrade the older handset before using on the W60B. When you upgrade the older handset via W60B, the number of the handsets registered on the W60B should be no more than 5. If it is more than 5, deregister the newer handset first and then upgrade the remaining handsets. Repeat the step to upgrade all the older handsets. Once all handsets are on the right version, you can register up to 8 handsets on the W60B.

Handset Registration

You can register up to 8 handsets to one W60B base station. Each handset can be registered to 4 different base stations.

When the handset LCD screen prompts "Unregistered!", long press (📶) on the base station till the registration LED flashes. There are two methods to register a new handset:

Easy Registration:

1.Press the **Reg** soft key on the handset to register quickly.

Normal Registration:

1.Press the **OK** soft key on the handset, and then select **Register Handset**.

2.Select the desired base station and then press the **OK** soft key. The handset begins searching the base station.

3.Press the **OK** soft key after searching a base station successfully.

4.Enter the base station PIN (default: 0000), and then press the **Done** soft key to complete registration.

To register to multiple base stations, press the **OK** to enter the main menu, and select **Settings->Registration->Register Handset**, then repeat steps 2-4.

Note: • If the handset is registered to the base station successfully, the handset LCD screen prompts "Handset Subscribed" and "Base NO."(last 4 characters indicate the base station's MAC address).
• If the handset LCD screen prompts "Searching for Base", check if your base station is powered on or not.
