SENSES RANGE

Senses hand sanitiser gels are advanced formulations that have been designed for the rapid and reliable disinfection of hands. Senses sanitisers will help protect you against germs and viruses, killing 99.9% of all bacteria whilst still providing a soft and safe feel to skin. Our range consists of neutrally fragranced sanitisers in both alcohol and alcohol-free formulations, a highly fragranced small pocket-sized pack and even an option for kids! Our alcohol-free formula kills 99.9% of germs, has the BS EN 14476 certification and is kinder to the skin. We also use this unique and very effective formulation for all of our fragranced sanitisers.

-Kills 99.9% of germs & bacteria -70% Alcohol & an Alcohol-Free Formula - BS EN 1500 & BS EN 14476 – **Covid Certified** -Recyclable packaging.

STERILE AIR SYSTEMS

- Kills all cold and flu viruses, MRSA, Norovirus and all strains of Covid-19.
- Eliminates smoke and odours.
- Can aid with asthma, hay fever and snoring.
- Can reduce fallow time by up to 50%.
- Sterilises the air up to Log 10, and will dramatically improve the effectiveness of your current hygiene protocol.
- This system kills all airborne VOC's/Biohazards, Bacteria, Viruses and Spores.
- Reduces any airborne particulates over 0.1 Micron.
- This system massively reduces the risk of infection from one person to another.
- The units are odourless, and low sound.
- Low running costs.
- Simple plug in and on/off switch.
- The unit will require an annual service which will extend the warranty up to a 5 year manufacturers guarantee.
- Range of portable plug and go, and also fixed unit systems.
- We offer a 30 day no quibble money back guarantee, if you are not 100% satisfied with this machines performance.

elixir HOCL

the global solution

Hypochlorous acid is lethal to every pathogen known to man but completely harmless to humans and other mammals.

It is a disinfectant that is 100 to 300 times more effective than bleach (NaClO example Milton) – yet is nontoxic and non-irritating! Bacteria cannot develop resistance to it – in fact, in scientific tests it has killed every

pathogen (virus, bacteria, fungus, mould, etc) which it has been scientifically tested against.

Not only is hypochlorous acid an amazing disinfectant but it also speeds up the healing. Why this is so is not precisely known but it is likely to do with the “redox” reaction, a key process of this special solution.

It is

believed that increases Bioactivity by facilitating improved inter cellular communication.

Although “acid” – it actually isn’t acidic at all because it only exists as a neutral pH solution! In order for this

disinfectant to be most effective it has to be neutral pH like, water! (7pH).

Contact us for safety and specification sheets

The reported benefits of Hypochlorous Acid include:

- Speeds up healing of wounds
- Disinfects wounds, cuts, burns, etc
- Kills bacteria and viruses on contact including E.Coli, Listeria, Salmonella, HIV, and MRSA
- Kills fungi and moulds
- Isn't harmful to humans or animals
- Non-irritating, non-stinging

The possible uses of Hypochlorous Acid include:

- Wound healing and disinfection
- Eye infections
- Ear infections
- Sore throats
- Flu's or other illnesses
- Food poisoning
- Disinfecting tools, surfaces, equipment
- Disinfecting vegetables / fruits / meats
- Disinfecting areas that have been infected by vomit or diarrhoea
- Disinfecting linens / materials (i.e covered in diarrhoea, vomit, or blood in disaster situations)
- Disinfecting ALL airborne pathogens by placing in a humidifier
- Disinfecting water of all pathogens
- Disinfecting dishwashers

PROFESSIONAL TEST KIT

Antibody Rapid Testing

Fortress can provide antibody testing using ELISA immunoassay, CE Certified COVID-19 Rapid Test Cassettes for healthcare professional use and Home Based Kits for use by an individual will soon be available.

1 . Fortress COVID-19 Rapid Test - Currently available and CE Certified for use in UK

Fortress Diagnostics developed and manufactured this new test that detects the new strain of COVID-19 (Coronavirus). A single use, rapid device for qualitative detection of total antibodies against 2019 novel coronavirus (SARS-CoV-2) in human serum, plasma or whole blood specimens.

The tests are in 10T (10 test) and 20T (20 test) kits and a pipette for blood collection is included. The tests must be administered by a healthcare professional.

This test format is most suitable for industry and institutions who wish to provide reassurance for their workforce.

PROFESSIONAL TEST KIT

Rapid Test Key Features

Rapid finger prick test for coronavirus
Results available in only 15 minutes
Results can be read visually
No need for an analyser
Screen and isolate carriers
Four simple steps

Advantages

Pre-screen for previous COVID-19 infection
Assists in understanding current stage of infection
Reassurance
Rapid results
Confidence - REACT Study
Safe, simple and affordable
Employers can determine prevalence in their workforce and can assist NHS data gathering
Encourages employees to adhere to company guidelines
