

Healthcare

IT-RS offers a range of services that are tailored to the needs of the healthcare sector. Our areas of expertise include IV&V, program evaluation and review, strategic planning, service model development, program monitoring, health economics, benchmarking, and policy analysis.

Stakeholder engagement is an essential component of our work. Governing principles include a culture of collegiality, openness, and flexibility. We also pride ourselves on the depth and quality of our qualitative and quantitative analysis, and the readability and clarity of our reports.

Some of our engagement expertise are, but not limited to:

- Healthcare (Government, State and Local) Program Evaluation
- Healthcare DDI (Design, Develop and Implement)
- Healthcare IAPD, APD development
- Healthcare Technology Assessment
- Healthcare Program Development
- Health Services Planning
- Workforce Planning
- Organizational Development
- O&M
- Etc.

It is important to note that throughout the lifecycle of Healthcare sector services, IT-RS has effectively integrated cross-functional services ranging from inception, delivery and on-going operations using other complementary tools and services verticals.
