Hello David

On behalf of Snowy Hydro and the Snowy 2.0 Project, I would like to extend my sincerest thanks for the effort and expertise that you have brought to discussions in regards to the modelling of the powerhouse cavern so far.

Your expertise and ability to rationalize extremely complex modelling has been invaluable and greatly appreciated.

Without your endeavours on the matter of the cavern, we would not have been able to close out these discussions resulting in an acceptable design to proceed to the Detailed Design stage.

Kindest regards  
Dave Evans  
Snowy 2.0 - Director of Engineering
