

::: AAIU PROMO and MESSAGE to the U.S., U.N, and all Black People

The AAIU Juneteenth-Black History Month (BHM) Celebration/Education/Economics Project:
To Promote the AARS Black Reparations Plan and Advance America's Dialogue on Racism:
To get Reparations for African Holocaust and Black Slavery Descendants, and Build Safe Cities:

There is an emergency call from the people in this nation for the AAIU to form the AARS Congress on behalf of Blacks, because they are watching African-Americans constantly being victimized and killed due to random acts of violence and racist police. Blacks are also systematically separated and oppressed by racist laws and social service agencies, so they need reparations immediately.

* We will ask the people to help form the congress because their protests prove they want to find solutions for ongoing problems, and walk towards repentance. I wrote the AAIU AARS plan to reach these goals by creating and offering programs for spiritual growth, conflict resolution, cultural recovery, social and economic parity, reparations assessments, and racial healing.

The beneficiaries of slavery use the welfare, housing, and other social programs to keep Blacks divided and deprived of equal rights. That prevents them from creating a strong united front, before inviting a racially mixed group of scholars and activists, to dialogue collectively to solve their problems, and get proper representation and justice for Blacks and poor people.

We will counteract that madness by forming the Congress to help Blacks, as a diverse power group, to organize conscious groups and leaders, to implement findings from agencies, reports, and politicians, **to help uplift Blacks to equality**. We know the government made many promises, but never came close to implementing any of the proposals, and even lied to avoid upholding that duty.

Upon gaging progress in this education project, it will become obvious that many average, successful, rich, and conscious Blacks, and others, have tried to help a few African-Americans, which is something all good people appreciate. But we need 5-year case studies and the T&R Process to solve problems and improve police and race relations.

Now the fact is they are intentionally misled to help a few, when they have the ways and means to liberate the masses. Blacks should become a sovereign people with their own land, living in **safe cities to have peace**, after **long eras** of abuse, slavery, contributions, patriotism, and paying taxes!

Upon evaluating society, we recognize conditions are much worse now, than they were during the CRM 40s-60s era, with AIDS; Cocaine; Viruses; Unfair Jail Sentences; and in the Aftermath of Natural but Catastrophic Disasters. So, the nation should have compassion for African-Americans because Blacks are harassed daily, killed too often, and stats prove they are not close to equality.

That indicates Blacks should work with allies and others to solve their problems, instead of waiting on lies and promises from the government, or anybody else. When protesting spread across America, after the unjust killing of many Blacks in a short period of time by the police, defiance was understandable, but these repeated circumstances and poor conditions require a plan of action.

I wrote the AARS plan to form a powerful spiritual, legal, and political AARS Congress to implement the plan by taking strategic action. Action based on ideas, plans, and proposals from Reform Systems and Social Scientist, with a track record of helping victims of long-term suffrage.

After 40 years of research, I wrote the AARS plan to unite and uplift all African-Americans/Blacks, and Poor People. We should have a Plebiscite Vote (PV) among Blacks only 18 and older first to get their consent to use the AARS plan, or the plan we choose in the PV. Then ask allies to help implement the plan.

The AARS plan will consolidate dialogue to solve problems caused by racism, help Blacks build safe repatriated and sovereign cities, and start a massive campaign that will become a movement until Blacks get Reparations for Slavery; and 500 years of Racial Oppression!

My studies enabled me to write a book; which I copied from PDF files to CD, and I also produced a dynamic DVD. I am using this Promo Page, the AARS Promotion Page, the AARS Plan, the CD, and DVD to show how bad racism has hurt Blacks. That proves they should have gotten reparations right after slavery and way before others. The products will also inspire allies to endorse AARS.

It took 40 years of intense research to produce these five thought provoking products, which will advance racism dialogue, and teach Blacks to explore alternatives to integration, especially sovereignty. The Plebiscite will help Blacks become sovereign to gain **freedom**, or remain in integration, where they are denied **justice**. They know Marcus Garvey said racism is lodged deep in the minds and institutions of those who have complete power and control over their lives. Therefore, they should dialogue until they gain access to full rights and standards of **equality**.

Honest AAIU Racism Dialogue will teach people to appreciate, or tolerate all races and ethnicities. This will help ease racial tension in our schools, cities, and nation. Our goals embrace constructive dialogue to solve problems and help Descendants of the African Holocaust and Black Slavery recover from racial attacks known as racism. Blacks have endured hell on earth, so that is why they should demand reparations, to elevate themselves into sovereignty, and prepare for repatriation.

In Memory of Africa, Chains, and our Ancestors,
Most Sincerely,
Brotha Cliff Pruitt
