

AARS Part I

The African-American Reparations/Sovereignty (AARS) Global Black Reparations Plan

**A Humanitarian Project for Continental
Cultural & Racial Restoration**

**AARS is Fairness Justice & Satisfaction for Blacks
and Racial Reconciliation with all Nations & Races**

NOTE: A Strict Call for Reparations to Blacks for The Last 500 Years of Damage; Focusing on all the Injustice Before, During, and After Slavery, and Painful Repeated Cycles of Unjust Police Killings; This AARS Position Leads to the AARS Plan in Terms of Equity Restorative Justice (ERJ); In ERJ Victims Settle for Less Than the Debt; but Demand Ample Resources to Repair their Broken Family in America, Africa, and Globally; {In AARS **we Generate Wealth to Relieve Culprits of their Duty to Repair Damage, and Victims of Suffering from Economic Exploitation:**

African-Americans are fortunate to know hundreds of communities and organizations across the country, are considering providing **reparations to blacks for generations of abuse, oppression, racism, and slavery**. Places like California, Massachusetts, Rhode Island, North Carolina, Iowa City Iowa, and Evanston Illinois; along with religious denominations like the Episcopal Church; and prominent colleges like Georgetown University in Washington.

We have an issue on the reparations plan that was posed for a few blacks on housing restrictions in Evanston. The civic group that posed the program that landed in 2019, said pro reparations groups offered pro-bono legal aid if the program is challenged. All blacks and everyone else should challenge the program, because it is not a reparations plan, it is only a housing redress program, for a few qualifying blacks. The dissenting voter stated the effort is paternalistic, and assumes that blacks cannot generate or control their own money. **African-Americans should claim AARS to generate wealth, and to move towards unity, independence, and liberation.**

Reparations are meant to repair damage done to all blacks, not a few in certain areas, or massacres. There are cases brewing where some blacks are misguided to try to get reparations for a few blacks. The proper way to approach reparations is with a plan that identifies the wide range of damage, using and creating applicable programs to repair that damage, and listing issues and lingering problems we should solve ASAP. We fought the Civil Rights Movement (CRM), to gain rights that would have led blacks to equality. But we were fooled with integration, so now we need a 2nd CRM to win those rights, and to slowly dissolve racism and police terrorism. The 2nd CRM will be the Reparations Movement, to win our rights in a peaceful and political process.

In AARS we use all 3 models of reparations for the collective for all 50 million blacks in the U.S., and a personal settlement, with a priority on poor blacks, HBCU's, and black institutions. The 3 models of reparations are (1) Improving Integration, (2) Expanding Repatriation, and (3) Creating Sovereignty. We need **\$18 Trillion** for programs to improve, expand, and create each model, with **\$8 Trillion** for individual relief, plus **\$5 Trillion** for reserves and unexpected costs, **(that is \$67 Trillion, an ERJ settlement)**, as we {prepare for sovereignty with programs}. Yes, blacks still get relief if they deny sovereignty, along with the option to engage various cultural and social {programs to transform, or to remain stable}, for healing purposes, and for healthy and productive living. In AARS we also produce and search for programs to create and find jobs.

Blacks need reparations now, because others received reparations, for much less damage and/or loss of lives, yet they were granted their own reservations or territories, so blacks need their own repatriated and sovereign land. Studies prove they should create, build, form, own, and operate their own schools, hospitals, corporations, military police; and entire infrastructure with superior homes, roads, highways, shopping malls, parks, and communication systems; with all the requirements and luxuries which are essential, visioned, and designed to build elite safe cities, at home and abroad.

Blacks are divided, deceived, and in danger, so they should unite around this AARS plan to ask the government for 40 square miles (40mi²) of land, (symbolic to 40 acres and a mule), to build their own new safe repatriated and sovereign cities. They deserve sovereignty after slavery to stipulate group autonomy and collective progress. **Their Internal Black Plebiscite Votes (PV), during Black History Month of 2022, for blacks only 18 and older, to claim an indigenous status, and to improve integration, expand repatriation, and create sovereignty, should be their collective response to institutional racism and police terrorism!**

Manhattan, NY is 33.77mi² with 1.63 million people. Manhattan operates as one of the world's best and leading commercial, financial, and cultural centers. Our new repatriated and sovereign cities will be similar, for our **Black Family Reunion and Cultural Restoration Process**, by being planned for and applying healing, repairing, recovering, and transforming programs and services. A priority should be to profess and reclaim our true homeland, culture, and heritage.

This AARS Plan emphasizes leaving corruption in integration, for peace and prosperity in repatriation and sovereignty. It includes youth programs to decrease foul language and activities for racial improvement, and adult programs to self-actualize, set goals, and teach good values to their children. They should also do 5-year case studies on all companies, institutions, and systems in America, because blacks depend on these sources for socialization into life, and a democratic nation. **Everyone should endorse AARS for black reparations, and to conduct 5year studies for positive changes in society, to benefit blacks and everyone else in America.**

There are advantages with (1) sovereignty as an alternative to (2) integration, primarily with problems which stem from slavery, which have created deep divisions among blacks, which they must solve among themselves. They can work towards pride and unity, even if many of them do remain integrated, as they protest for change to attain peace and collective progress. Secondly, they remove themselves from harm and unwarranted fatalities in integration, while they get the option to learn, and to use their abilities, networks, and skills to build their own elite safe cities.

Blacks should live in all (3) models or settings, because they walked and struggled with Whites and Jews to achieve equality in integration. However, their position also includes embracing (3) repatriation, because they are deprived of basic civil and human rights, because of the color of their skin, therefore they are mistreated. So, they should protest for 5 years to demand justice, and work to mend and uplift their extended and global family relationships. They can build their close

southern and distant diaspora relatives, elite safe cities on prime repatriated land. This is an AAIU to AARS Congress Program for the Black Family Reunion, and International Peace.

African-Americans and others would appreciate it if athletes and others who are concerned about justice and equality, would protest and sponsor AAIU Racism Dialogue for the next 5 years, because the facts show problems are very bad, and getting much worse in integration; so blacks need alternatives, when it comes to a permanent residence. Our repatriated and sovereign city designs comfortably accommodate 1 million blacks. We will build more sovereign, repatriated, recovery, and Revival Black Christian and Pro Black Nationalist Cities, for 2 million blacks at a time, by building 2 cities at a time, by the grace of God.

Reparations funds are in the upper trillions, so it may be best to use the SEEG source to generate wealth for the next 5 years. If we demand those guilty of enslaving, or exploiting blacks to donate trillions, or we file lawsuits against them, **as we should**, that could cause resistance. Blacks already have enough problems to solve, from African Invasions, high death tolls from stress related illness, unjust laws, (drugs, alcohol, and menthol), Tulsa and other Total Town Attacks, severe emotional trauma from police killings, and man-made viruses. After 500-2000 years of stifling mental anguish and social impositions, **most blacks** really do want & need help.

The AAIU data base identifies 17 corporations who surely owe blacks reparations. We also hope and pray that the U.S. Government, the Roman Catholic Church, and the Bush's and Rothschild's will cooperate, because AAIU data has proof of them profiting from slavery, and/or exploiting blacks. We ask this list of 21 guilty groups, then all others with wealth and compassion, like B of A, Citi Bank, GM, and Wells Fargo, who committed to economic development for underserved communities, to consider using the SEEG source to help blacks generate wealth for reparations.

EXAMPLE: as clients they open a new 5B cash account, with no risk of losing funds, to generate wealth (100B up to 3T), in 1 year (pending program openings). Since they are invited to such a lucrative venture, we ask them to keep a huge profit of 40%, to graciously contribute 40% to the AARS Congressional Account for our humanitarian cause to build safe cities and to contemplate emotional therapy, and 20% for platform, attorneys, bankers, credit facilities, conglomerate business, agents, and fees; then repeat the deal 4 times. Now note the profit splits are negotiable.

DETAILS: (We ask our government for the land-grants; for all blacks 18-54 to get a 50k, and 55 and older to get a 200k tax free emergency relief check on 11-1- 2022); for engineers and unions to build two elite safe cities and train our adults, { ages 18-34 \$4000 a month, and ages 35-54 \$8000 a month}, to build and maintain our cities; we ask the army, navy, air force, and marines to build a small strong base on all of our cities perimeters, and train our young adults to become the military police. Then, they may agree to appoint or leave some strong soldiers behind, to patrol with our people they train, to keep our cities and residents safe. It takes a move of this magnitude to stop the police and supremacist from unjustly killing innocent and unarmed blacks!

The priority should be to leave racism, unjust police killings, and multiple problems in integration, for freedom, justice, equality, and safety in repatriation and sovereignty via reparations. Recall, the punishment should fit the crime; so, reparations should materialize to repair the last 500 years of exacted, excruciating, and encroaching damage.

Implementing these amenities in quality and quantity are manageable, requires 50 years for blacks to build safe cities and to heal, and they should **replace negative fixtures**, which have become normalized in their daily interaction, (like offensive foul language, intense vulgar music, and aggressive lewd behavior), which came from bad experiences with racism and oppression, **with their classical, identifiable, and noble names, languages, customs, and culture.**

Now those in power are using their groups to endorse or produce a black reparations plan. **That could create obstruction** like the H.R. 40 Hearings, the T & R Process in South Africa, and the trial run for reparations in Evanston Illinois. Everybody should monitor that activity to eliminate confusion, and circulate this AARS Plan, to ask the government, those in power, their various groups, and the entire public for their endorsement. This is how blacks become proactive in claiming a reparations plan. They should not wait for or expect others to produce a good plan. AARS makes it easy for culprits to contribute resources they owe, and the compassionate can also donate, so that victims get a fair and just reparations settlement, that they need and deserve.

A beautiful aspect of AARS reparations is that it can be a healing source for the races. It gives culprits of causing damage a way to apologize, and make amends for stolen wealth and forced slave labor, and they could opt for a huge profit, while the compassionate also get a chance to recognize our collective demise, and donate to our cause to help us build safe cities and heal psychologically, as they could also opt for a huge profit, and victims can opt to undergo programs for therapy for healing, repairing, recovering, and transforming.

Black people should want to and have a strong desire to transform, to create new images of themselves, reflecting the legacy of their great kings, queens, and citizens from Africa; to help reduce and eventually eliminate bad stereotypes; which causes bad treatment for blacks globally.

Spirituality and land are key components African-Americans need in a plan, to facilitate and maintain productive programs for repairing damage, a better life, and prayer to stay the course. We suffer from losses in economics, social services, and properties; cultural assimilation; internal pain; prolific damage and injuries; and preventing group autonomy. AARS operates to find and create solutions, and the AARS Congress will identify and produce programs for action.

The races get along good at musical, political, and sporting events, so reparations should unfold utilizing peaceful promotional campaigns, for the races and especially the police, to keep that same level of appreciation and respect for one another, in our daily lives. When blacks get their own land, others will give them respect, so that they can build safe cities, and develop programs for emotional therapy, since they are victims of many harmful, and long-term eras of trauma.

{Race relations have been very bad and are getting much worse. A brief parting will help the races learn to respect one another like a divorce. People divorce then reconcile after forming a sincere mutual respect, to keep good relationships that last forever. The AAIU presents the sovereign model of AARS, as an American social service through the AARS Congress, for racial reconciliation}.

The whole country should engage in AARS, because we discuss advantages of sovereignty over integration, and we discuss great benefits for America, by making her descendants of slaves, happy and productive residents, instead of unhappy welfare recipients, who are still victims of cruelty and brutality. It also satisfies agitators who preferred segregation. They constantly battled blacks being integrated for decades, yet blacks were still forced into hostile integration, under fierce opposition, harming both blacks and whites. This AARS strategy is good for many reasons, mainly in positioning to initiate racial healing, repairing, and unity among blacks, but also to create a path for genuine and lasting racial harmony with all others at home and abroad.

In Carson our parents taught good family values and we had a strong support system. That sound background gave me insightful visions to nurture of helping others. I developed good habits and a desire to read for long stretches in elementary school, upon engaging the Head Start Program. I went on to Jr. High and participated in campus activities related to communications. I enjoyed watching music, sports, and promotional campaigns bring people together, creating the most festive, fun, and memorable occasions. I grew 10" the summer before High School, so I learned the fundamentals of basketball, and became a Legend at Verbum Dei High in Watts in 1979.

I was a gifted 6'8" point guard, trained hard, and became an All American who won a scholarship to UCLA. I transferred to UAB because coach Larry Brown lied, and did not let me play the point. After I left UAB I found out coach Gene Bartow was in cahoots with Larry, so he deceived me on playing the point. He let me play the point for the whole year that I sat out. Then when I became eligible, he switched my position. I tried to appeal but they black balled me after lying to me, and telling lies on me! That was cold blooded and it still hurts. I was a victim of racism in sports by owners, associations, and coaches abusing their power, as were many athletes like Muhammad Ali, Curt Flood, Raymond Lewis, and Colin Kaepernick. We should investigate racism in sports to secure equal opportunities for many more blacks to own, manage, and coach.

I had to go overseas to play and retire in Switzerland. Then I returned to UCLA to get my degree in Sociology. Then I worked as a group supervisor at a volatile detention camp where they filmed the Gridiron Gang. Since then, I studied big business, became socially active, and aspired to be a civil rights leader. Now I am a devoted asset manager, community activist, and problem solver. These experiences keep visions of helping others in my mind by sharing programs to help slowly dissolve racism and police terrorism, and posing programs to facilitate true racial reconciliation.

I am raising 460B to build two cities. One repatriated and one sovereign **ELITE SAFE CITY** for descendants of slaves, and survivors of disasters, and displacement. Those victims are in great need of help and they need a curriculum, to prepare themselves to compete in high tech job markets, and other fields projected as being in great demand for future employment. We also host programs to elevate civil, social, and moral values. The AARS intent is to get justice for blacks, to create a path for everyone in America to cope and feel safe, and to promote positive police and race relations nationally and globally.

All places of worship, spiritual entities, and concerned citizens should partake in implementing programs, to raise all expectations and standards for all youth in America, **to become race sensitive people**. This AAIU program which will be implemented by the AARS Congress, is key to changing our socialization patterns with all youth in America, on race relations, from hostile and secluded, to amenable interaction. Racism is a learned attitude and behavior, so, if adults start teaching children to be race sensitive by respecting other races, instead of race haters to hate other races, all youth will grow up to be friendly to other races. Our youth should become respectable, tax paying, peaceful members in society, instead of violent gun toting war mongers.

We need 20B for **SSUT Projects** to help protect our nation and our cities; 10B for an **Oil Company** (to build small refineries, and later a major plant); and build a **Plastic and Aluminum Recycling Plant**, all three to create thousands of jobs in processing, assembling, warehousing, and transportation); 10B **to buy a Baseball, Basketball, and Football Team, and build an Exquisite LA Ram like Stadium** for big events, concerts, games, voting, and more jobs; 7B **Agriculture and Energy**; 6B **Aero/Med/Tech University**; 4.2B **Clothes and Toiletries**; 4B **Hospital/Recovery Center** in our serene area; 3.5B **City Workers, Maintenance, Waste, and Water Treatment**; 3B **Research and Development to Improve Family and Social Skills**; 2.5B **Parks & Rec**; 2B **Entertainment Productions**; 1.4B **High Rise Business Plaza**; 1B **WS Blazer Child Living, Training, and Mentor Facilities**; 300m **Gold Project**; 100m **Education Plan**.

Subtotal 225B

I am in direct contact with all principles for all projects named above, and they expect me to get funding. I am in possession of and have discussed their business plans extensively. They plan to adhere to environmentally sustainable standards, to limit bad air omissions and poor product manufacturing. Projects named above are humanitarian in nature via raising funds to create jobs, expand tax bases for our local and national social services, upgrade K-12 education curriculum in California, then expand nationally, and implement educational programs to improve police and race relations.

THANK YOU FOR ALL CONSIDERATION

Note: (+5B) for Project Safety & Admin Service

Total cost for one city is 230B

We are complying with national and international guidelines, and are embracing social progress for those in great need, after enduring extreme and lengthy devastation, like slavery, segregation, and natural disasters. We focus on infrastructure, and revival work; building new cities, keeping hope alive, and uplifting human hearts, minds, bodies, and souls. So, please keep George Floyd in mind, new cases of terrorism, and recall similar cases like Rodney King's, and Breonna

Taylor's. Then know blacks need a 70% yes Plebiscite Vote (PV) during Black History Month of 2022 at a designated Black Church, to claim this AARS position for reparations. We will provide a list of churches on 12-4-21, as an addendum to the AARS plan.

This AARS plan includes introducing a class on concealed Black History, (how racism became institutionalized, slavery's dominating legacy in the mentalities of blacks, whites, and jews), and posing AARS reparations as the solution. This will give African-Americans a wide range of information on these topics, which will prepare them for their two internal PV's. Blacks should learn that repatriation is going back to Africa, down south, or any other place where blacks were enslaved or exploited; with a good understanding of the customs of the places where they choose to go, along with the promise to improve relations within their global black family, and with ample resources to build elite safe cities. Blacks should also learn that sovereignty is their salvation in America. They get their own land, form their own government, then develop a new mindset to own, operate, and control all affairs, businesses, and institutions within their borders.

Blacks should have their second PV to determine how many blacks prefer to continue to live in integration, how many prefer to repatriate, and how many prefer sovereignty, after learning that they do have alternatives to living in integration. Then we will know how many sovereign and repatriated cities, we need to build for descendants of slaves. We also need presidential and congressional action on U.S. racism, police terrorism, and dangerous and growing systematic and institutionalized corruption! The AARS Congress will assist them in this 5-year case study program.

It would help if everyone or most people in America, would study this AARS position and take the class starting on 10-4-22, to study racism, to learn how we can overcome that deadly disease collectively, as a majority of calm and united people in America. Then give your support in a brief note stating approval of this AARS position, and everybody can submit their brief ideas on how to help repair the Black Family, during Black History Month of 2023; on the bottom of the last section of number 10 of this website.

The AARS plan like the website will help to educate America on Black History, Racism, and Reparations, to prepare Blacks for their internal PV, and to prepare others to offer their ideas to

help repair the Black Family, during our month to vote in February of 2023. The PV is a part of the AAIU's Black History Month - Juneteenth Project for 2022, to help repair, transform thought processes, (and go on a mission to secure safety, pride, and unity for Blacks with the AARS plan). We should rebuild our dear beloved Black Family at home and abroad. Then, we can also seriously consider working towards true racial harmony with all other peoples in America, and around the world. Trust in One God, One World, One Family, and One Love.

Peace and Blessings,
Brotha Pruitt
