

AARS Part III

The African-American Reparations/Sovereignty (AARS) Plan in Equity Restorative Justice (ERJ) Terms

**The Focus is a Black Plebiscite Vote (PV)
to (1) Claim an Injured & Indigenous
Status, (2) Endorse AARS & (3) Claim 1
of 3 Reparations Models for Residence**

**AARS is Fairness Justice & Satisfaction for Blacks
and Racial Reconciliation with all Nations & Races**

It is critical for all Blacks to know the government is considering providing reparations, because they are liable for massive damage including slavery and segregation. Blacks are always kept in the dark when it comes to political activity that will affect their people. They should not let this happen with reparations. They should vote on a reparations plan, then have a 2nd Civil Rights Movement (CRM) to let the government, their people, and everyone else know what they want and need for reparations. They should want to produce, claim, and file their own reparations plan.

NOTE: A Strict Call for Reparations to Blacks for The Last 500 Years of Damage, Focusing on all the Injustice Before, During, and After Slavery, and Painful Repeated Cycles of Unjust Police Killings: : This AARS Position Leads to the AARS Plan in Terms of Equity Restorative Justice (ERJ), In ERJ Victims Settle for Less Than the Debt, but Demand Ample Resources to Repair their Broken Family in America, Africa, and Globally. In AARS **we Generate Wealth to Relieve Culprits of their Duty to Repair Damage, and Victims of Suffering from Economic Exploitation:**

Reparations are meant to repair damage done to a group or a race of people. The U.S. government has given others reparations for much less damage than Blacks encountered, and we all know that is not fair. So, Blacks should vote on a plan to unite around, then engage the 2nd CRM, with the plan they vote for as their goal in the 2nd CRM struggle. This will put pressure on the government and other guilty parties, to make it a priority, and to move with a sense of urgency; to pay reparations to Blacks in 2022, by generating wealth with SEEG Marshall Plan Programs ASAP.

The Black Plebiscite Vote (PV) will ease complexities in claiming a group status, a reparations plan, and 1 of 3 reparations models to reside. African-Americans need the money ASAP, but they should be just as concerned with repairing generations of damage, as they are with getting the money. Henceforth, they need the money with a comprehensive plan. Reparations should unfold to help all 50 million Blacks in America by utilizing the 3 models of reparations for collective compensation, along with an emergency relief check later this year on 12-1-22, for individual compensation. The 3 models of reparations are (1) Improving Integration, (2) Expanding Repatriation, and (3) Creating Sovereignty. Now we explain the (3) models, and how using the PV proclaims Blacks are indigenous to this land, because the first people on this land were Ancient Black African Olmecs, so they should have the rights and privileges of indigenous people.

Improving Integration: Explained on next article AARS Part IV.

Expanding Repatriation: Explained on next article AARS Part IV.

Creating Sovereignty: Explained on next article AARS Part IV.

Damage: Explained on next article AARS Part IV.

Self-Destruction and Black on Black Crime: African-Americans developed a self-destructive and divisive slave mentality after 200 years of the Willie Lynch Indoctrination. They have a desire to unite but obvious and hidden barriers prevent all efforts. They should use AARS for another attempt at unity, but first make it mandatory to excommunicate all sell outs. Blacks would do themselves a world of good if they would put an extra effort into recognizing that the Lynch

Indoctrination taught and molded them to hate and distrust one another, and that is why it is so hard to unite Blacks, in order to solve crucial and lingering problems, and prepare for the 2nd CRM.

This slave mentality has Blacks so twisted and confused until there are even some places in Africa and throughout the Diaspora, where older Blacks are telling younger Blacks not to interact with Blacks in America. Young Blacks in those areas are coming to realize that is deepening and extending divisions among our people. Even worse Blacks in America have become accustomed to hating, distrusting, and deceiving one another, by taking on their slave masters' mentality. Black people should claim AARS to identify and create programs to slowly dissolve the slave mentality. This mind set has Blacks trapped in deadly black on black crime, so we must engage transforming.

Guilty Parties: The Roman Catholic Church; 7 European Nations; The Jews; 17 Corporations; U.S. Companies, Institutions, and Systems, and the Bush's and Rothschild's. They all are liable for murder and eras of theft. In truth and reconciliation when combined they all owe Blacks trillions of dollars for past and present transgressions, which were and are described as "In Black Suffrage" and "Crimes Against Humanity". Now it will be a big mistake for Blacks to take money without a plan, because African-Americans like others have a tendency to celebrate when they get money, or good news, and on holidays. However, we know evil people are working in secret right now to try to give Blacks reparations money with no plan. Therefore, we produced the AARS Plan.

They want to give Blacks reparations with no plan, because they want to give Blacks reparations with conditions, limitations, and strings attached, which is all bad, and will work to have Blacks in a worse condition in five years, than they are in now. This is a well-known problem that exists in a pattern, when it comes to representation for Black people. We know the government has a history of using Blacks (sell-outs), and non-blacks (racist) to prevent black unity, and collective movement. They want to issue orders to downplay and prevent the 2nd CRM. We should offset that demonic activity by producing, claiming, and noting our own reparations plan, that includes emergency relief next year, along with a plan to repair the vast damage via programs and services. Guilty parties owe us an apology, and a promise it will never happen again, along with the money.

Full Restitution:

A profound statement like the World's Economy and America were built on the backs of Black slaves, indicates Blacks should own most of the entities, so we keep this in mind when negotiating.

A Call to Review the Individual Monetary Settlement for Blacks via Reparations Payments In Reply to Mexicans Lobbying for 450k for Each Family Member Hurt by Trumps Policy

Blacks are victims of extreme and extensive damage, so they need reparations immediately! To expedite getting reparations they were going to settle for less than the debt owed in Equity Restorative Justice (ERJ). But they have waited too long, have lingering issues, new problems, and vast damage to repair. So, if the government continues to disrespect, insult, and deny Blacks when it comes to reparations, we must prepare for national action to demand full redress (DFR), including a plan and individual payments.

The most recent insult and insane act towards Blacks from the government is them just mentioning reparations to Mexicans for being temporarily separated from their families during the Trump administration. That is a very harsh and very serious insult because the Black Family was permanently displaced, separated, deculturated, transformed, then indoctrinated for slavery!! Now, if the government contemplates paying each Mexican 450k for a new crisis, let us review a formula for each Black person to receive a monetary award for historical crimes of \$2M.

First, we must factor in lingering effects to the mentality of Blacks from slavery and subjugation, and suppressed anxiety from racism, the Middle Passage, slavery, lynching, and segregation. Then we must factor in severe emotional trauma and acute psychological damage, from Post Traumatic Slave Syndrome to Unjust Supremacists and Police Killings. Then we must decipher variables from exclusion and losses in education, employment, finance, health care, housing, and loans. Then we reflect on assaults and imagery from the Civil Rights Movement, including racial attacks at Peaceful Protests, at Freedom Rides, Marches, Sit Ins, and Vigils. The culmination of all of these vicious hate crimes caused Blacks to experience a deadly spiritual decline, so Blacks need their own land away from all this hostility for spiritual recovery and management.

This plane of angles and magnitude of historical crimes, converts to a tabled mathematical equation utilizing aggregate algorithms. They scaled each Black person to receive 2M; that is $50M \times 2M = \$100T$, for individual payouts to Blacks in America, which they should receive in 100k increments. So, Blacks should demand 2M each, for past and present crimes, and for just hearing they want to give Mexicans 450k each for reparations, for a minor family crisis, as they deny Blacks reparations for major family crimes. That is causing most Blacks to suffer in dire and deep emotional frustration. Partly for just hearing the government is pondering redress for Mexicans, but really for delaying and denying Blacks redress. The government should help Blacks before any others, because it's a historical debt, that all honest people know should be paid ASAP.

{{If the government wants to continue to insult Blacks and delay us from getting our reparations, we should go into **national action by planning** for the 2nd Black National Political Convention, the 2nd Million Man March, that rolls into the 2nd Civil Rights Movement, to apply pressure for Blacks to get reparations immediately}}. Our due date for the government to award Blacks reparations is 6-19-22, because we vote in February of 23, and we should have gotten reparations right after slavery, so reparations are way past long overdue!!! If the government still refuses reparations by then, we start planning for national action, because we know reparations are way past long overdue!!! We start planning for this **5 consecutive-year-long-serious-national & international-action-campaign on 7-1-22, if we do not reach an agreement by 6-19-22.**

AARS Reparations Programs and Services: Reparations should unfold utilizing the three models of reparations, for the collective group. There is also an individual monetary settlement of \$2M for all Blacks in America, which may start with \$100k in December this year with the AARS plan. But most important is AARS has programs to repair generations of emotional, financial, and social damage. AARS also leads to creating programs for any deficiencies, faults, or vices, like depression, foul language, inebriation, or Post Traumatic Slave Syndrome (PTSS); along with services for Blacks without these problems who are stable, to remain stable and to set goals.

Spirituality and land are key components African-Americans need in a plan, to lament over loss of lives, economics and finances, and properties; to heal internally; to restore valuable cultural losses; to repair damage and injuries; and to declare collective autonomy. The AARS covers all these concessions, and the AARS Congress will identify and produce programs for implementation.

The races get along good at musical, political, and sporting events, so reparations should unfold utilizing peaceful promotional campaigns, for the races and especially the police, to keep that same level of appreciation and respect for one another, in our daily lives. When Blacks get their own land, others will give them respect, so that they can build safe cities, and develop programs for emotional therapy, since they are victims of many harmful, and long-term eras of crimes against humanity.

Race relations have been very bad and are getting much worse. A brief parting will help the races learn to respect one another like a divorce. People divorce then reconcile after forming a sincere mutual respect, to keep good relationships that last forever. The AAIU presents this sovereign model as an American social service through the AARS Congress, for racial reconciliation.

Blacks in America should have their PV during Black History Month of 2023 to find how many prefer to live in each model. We explain the differences in the three models on Part IV. So, Blacks needed \$62 Trillion for the three models and personal relief, plus \$5 Trillion for emergency and unexpected cost (\$67T), to design programs to improve integration, and to build elite safe cities. That was an ERJ settlement. Now we demand full redress (DFR) of \$200T for Blacks in America.

With AARS we ask the government to designate (40 areas); of 40 square miles of land; symbolic to 40 acres and a mule; as the land part of reparations for Blacks; so, they can build their own elite and safe repatriated and sovereign cities. Blacks need their own land because others received land for much less damage and encroachment, and the police and supremacists kill them way too often.

Now they have the ability, networks, and skills to build their own new elite safe cities. So, as a gesture of goodwill let them become a sovereign people to build their own safe cities, and remove themselves from racism and harassment in integration. There are Blacks who have proposals for virtually all areas of building, business, producing food and products, and repairing damage. They can plan to fund and utilize all of them with AARS late this year. Blacks can also get programs to learn how to become producers of all products to serve their needs, and producers of products in great demand, to engage in local, national, and international commerce, to buy and sell top line products.

All places of worship, spiritual entities, and concerned citizens should partake in implementing programs, to raise all expectations and standards for all youth in America, **to become race sensitive people**. Those AAIU programs which will be implemented by the AARS Congress, are key to changing our socialization patterns with all youth in America, on race relations, from hostile and secluded, to amenable and sociable. Racism is a learned attitude and behavior, so, if adults start teaching their children to be race sensitive by respecting other races, instead of race haters to hate other races, all youth will grow up to be friendly to other races. Our youth should become respectable, tax paying, peaceful members in society, instead of violent gun toting war mongers.

Dissolving racism and improving police relations is the “change” that will make America a much better place. The AARS strategy was written with visions to start a peaceful and political process, to achieve that “goal”. The AARS strategy is for everyone 18 and older in America to observe, as part of a program to seek pride and unity among Blacks, and racial harmony with all others, so that we can live in a civil society in America.

The AARS Congress will implement educational programs to facilitate Black pride and unity, to improve police and race relations, and to introduce programs and services to limit celebrating, in order to utilize reparations wisely. It is time for an era of peace and prosperity for Black descendants of slaves.

On a Mission for Unity and Humanity,
Brotha Pruitt
