

HOW TO END RACISM

ADDRESSING RACISM

Racism is a Great Advantage and Asset for White People, while being a Great Disadvantage for Non-Whites. It is Our Duty as Compatible and Responsible People to Come Together to Learn Reparations are in Order to Bring Justice to Black People.

::: How to End Racism

Racism was and is an attack on Africa and Black people. It has an adverse impact on others, and has been in effect for so long, until it has become a deadly disease. No one person or group can address the issue affectively. It will take a collective effort on the part of Blacks, Whites, Jews, and all others to maintain persistent agitation through using your platforms to shed light on both issues of racism and police terrorism. We should continue to protest in mass numbers, in many places simultaneously, to get the point across that most people in America want to have dialogue to slowly dissolve racism and police terrorism, so that we can live together in a peaceful and civil society. The combination of both of these forces working in unison, with the same goal of liberating blacks from racism, while protesting police and racist people killing blacks, is a movement. I sincerely thank all of the people who have been hosting dialogue and conducting protests to bring these issues to light, especially the concerned Black Men, Top Athletes and Black Lives Matter Women. This activity should continue for 5 consecutive years to be effective.

I cannot tell you how many people have called me to say how much they appreciate blacks and others collectively addressing both issues. It is a powerful scenario that I hope all parties continue to utilize for the best interest of African-Americans as victims of racism, just like they did back in the Civil Rights Movement (CRM). Because the struggle continues as we really are fighting for the same basic rights like equality, and against police and supremacist unjustly killing blacks, like we confronted back in the CRM. We have a great advantage now working in unison. It has never happened before. We always had Civil Rights Groups vs Black Power Groups issues, Black Men vs Black Women issues, and now Old School vs Hip Hop lyrics. Fortunately, the urgency to address both issues has toppled our differences, so that we can continue to work towards unity and liberation by forming the African-American Reparations/Sovereignty (AARS) Congress.

We Form the AARS Congress to Advance Americas Dialogue on Racism - From Talk to Action

We used the African-American Independent Union (AAIU) to Produce AARS

We use the Sports Entertainment & Education Group (SEEG) to promote

My background and the three Groups

My siblings and I were blessed being raised by navy parents sacrificing and providing, while emphasizing church and education. That support system led me to develop visions of helping others. After 40 years of research on Black History, Racism, and Reparations I became a Social Scientist, then produced two products, (a book/CD & DVD), to educate America on racism, and to introduce sustainable solutions. I used my products to create an AAIU agenda and the AARS plan to achieve this goal.

Now as a youngster I had basketball skills and became a Legend at Verbum Dei in Watts. I played in the Final Four with UCLA in 1980, then played and retired in Switzerland in '93. I went back

to UCLA at the end of '93 to get my Sociology Degree, and work at Camp Kilpatrick as a Group Supervisor, the detention facility where they filmed the Grid Iron Gang movie. My high regards for sports and discipline lifted my visions of helping others. Collective dialogue on my products to dissolve racism, ease racial tensions, and improve police relations will help all of America now.

The problem with dialogue on racism is America has a repressive tactic to use rich, famous, and publicity seeking people to participate, **to pacify the people**, instead of using those of us who are qualified, **to produce viable solutions**. We are forming the African-American Reparations/ Sovereignty AARS Congress, to help blacks, win reparations, and as a diverse power group to solve lingering and mounting problems. We can stop this well-known repressive tactic by utilizing the AAIU agenda, and AARS plan, suggesting participants should understand the reasons for, and activities of, the Civil Rights Movement, and have at least 20 years of experience studying pertinent issues particularly God, civilizations, history, populations, racism, slavery, societies, reform systems, problem solving, and reparations.

We are forming the Sports Entertainment and Education Group (SEEG), for blacks and others who are rich, famous, professionals, and college graduates, to keep God first and to use your resources and intelligence with our business plan, with no risk of losing your money, to practice collective economics, that will generate wealth for great personal or group profit, and help us build safe cities. With racism and police terrorism noticeably rising blacks are not safe, so they should build safe sovereign cities. That sanctions blacks to live in integrated, and safe sovereign cities in America. We need the valuable group of pastors, spiritual leaders, athletes, politicians, and rich and blessed people, to be obedient to God. Most people love this group, but they are engaging way too much foul language and activity. It is a bad influence causing deterioration and separation of the good social fabric of liberties in America, it is contributing to the decline of spirituality in society, and it shows a lack of care and concern for your fellow man. We love you, so show us some love.

We need this valuable group to set an example for the rest of the world by letting everyone know they really love, honor, and respect God, his commandments, and/or his laws, ways, and language for life. Now this change and improving America's dialogue on racism can be the beginning of a positive change for people in America, and the rest of the world. Change will come from top to bottom, not bottom to top. We need this valuable group, and especially the police, the general population, and everybody on earth, to start giving more respect to people of different races.

Addressing racism without an agenda or plan is a historical problem blacks face that prevents them from finding solutions for their problems. That is the main reason why they are stuck in poverty-stricken neighborhoods, with very poor social conditions today. The AAIU agenda and AARS plan has guidelines that will lead to honest dialogue to produce viable solutions.

It is important for us to designate blacks and others who are qualified and prepared; to participate in the AAIU Dialogue on Racism; to move in the same name and spirit of great Black; White; and Jewish Freedom Fighters; of the Civil Rights Movement; who worked and walked together for blacks to get equal opportunities; and to stop being brutally killed by the police and supremacists!

In God we Trust,
In Memory of the Civil Rights Movement,
Brotha Cliff Pruitt
