

# THE REPARATIONS EXPLANATION

AS WE RECALL AND EMPHAZIZE OTHERS  
GOT REPARATIONS FOR MUCH LESS  
DAMAGE

So We Demand the U.S. Government to Ratify  
AARS ASAP!

## Reparations are Required for African-Americans and All Black People to Repair the Damage Done to Their People:

{I} Learning about Africa and true Black History before the Roman-European led invasions in 332 BC. Prior to that time Africans advanced the sciences, built the pyramids and ruled the earth in a Godly manner. Africa and her people suffered mass exploitation following 332 BC, which led to many oppressive acts including the Pope's 1442 commissioning. He would ask Spain and Portugal to stop fighting over resources in Africa and suggested they partition Africa for colonial and enslavement purposes. Restoring blacks to a peaceful state of mind, environment and condition they were in prior to European and US invasions, slavery and colonialism requires learning the truth.

(2) The Europeans invasions were inspired by economics, environment and the potential of free labor, which resulted in Black Suffrage. A Jewish scholar said epithets and accounts that were not true were written into the ideology of religion by Jews, as Negro phobic language in religious works. Though the language was lies, it designated Africans as slaves to Europeans for an extended period of time. This caused black people to endure the worst experience ever perpetrated on any race of people. This was a vicious set of lies and actions that Europeans like to refer to as civilizing African people, when they were actually covering up their dirty deeds of slavery and colonialism. Research proves there were many lies written. According to the honorable Elijah Muhammad's, "Message to the Black Man" African civilizations were on this planet millions and billions and trillions of years before the grafted Europeans, so Europeans could not have civilized Africans. Blacks, Whites and Jews need to work towards a true understanding of the past, so that we can develop open and honest relationships for the future. Black people cannot remain victims of the current capitalist system in their consumer role. They must become producers by fighting hard for their reparations, so that they can establish billion-dollar corporations and institutions featuring the latest technology, for the sole purpose of looking out for the best interest of their people. African-Americans can institutionalize that course of action by implementing the Five Phase Plan.

(3) Centuries of slavery, colonialism and suffering caused by the oppressors created major criminals among Black people. This is where the mentality of a sellout begins and you can witness this madness in Black Leadership all over the world, especially in Africa. The black experience became so depressing and degrading that a criminal group of Black people developed within their race. They had desires to live free of this legacy of bigotry and hatred with no regard for the consequences. This group includes blacks who tried to pass as whites if they were light enough, over to the most dangerous blacks who use their political positions to get money instead of helping their people, who still exist today. They are those who are (brainwashed), who think Whites and Jews or others should rule them. They are those (sellouts), who let others dictate their voice and votes on issues and laws and they also include those (conspirators), who are in cahoots with others to subvert black progress and worst of all to water the Reparations Movement down to education. These black criminals are the House Negroes who are working in sin with opponents of Black Progress and Reparations to determine the direction and language of the African-American Reparations Package. Blacks should not let this happen. They should expose all of those individuals and groups participating in that nonsense in the Tribunal and the T & R process. They should deal with black race traitors just as America deals with unpatriotic criminals found guilty

of treason, espionage or breaching national security.

These criminal groups of black people have been used for hundreds of years to mislead and perpetuate divisions among the masses of Negroes. It goes all the way back to slavery. African-Americans have developed a process to address this level of black-on-black crime in the RULA. Any person or group suspected of prolonging or preventing progress in the Reparations Movement must be exposed and fed with a long handle spoon. Black people in America, Africa and the Diaspora should participate in a similar process to bring justice to blacks wherever they were colonized, enslaved and/or exploited. This process shall include self-evaluation because it is time out for white racism and black on black crime in all nations and at any and every level.

African-Americans can utilize the Five Phase Plan to address these three major criminal groups among their people, while focusing on producing a Reparations Package, which should contain solutions for every concern, issue and problem facing their people. They cannot let any attorney, educator, leader or group hold them back. They know they need resources to repair the damages done to their people, and they know those resources should materialize in a collective and individual compensatory manner. This would provide an abundance of resources to improve Integration, create Repatriation and establish Sovereignty as collective compensation, which would be coupled with individual compensation for blacks between 18-34 to receive \$2500 a month and between 35-54 to receive \$5000 a month. Blacks have also began the process of creating culturally reforming and reaffirming programs as they ask for elders of 55 and above to receive a negotiated amount between \$200,000 and \$2,000,000 each. This action represents working towards completing the struggle we left behind in the Civil Rights Movement, which was a national will that began with African-Americans expressing their desire to gain equality. Then the intensity grew as whites, jews and others who admitted blacks were victims of the system joined the movement. The Reparations movement will take the same direction.

**1. Explain the spiritual component? It is the most important aspect of Reparations**

- a. For Blacks to willingly participate in a personal, family and collective healing process (unity)
- b. For a healing between the races (other races understanding the condition of Black people)

**2. Explain the 3 models of Reparations? Blacks choose a model to reside in to find equality (I-R-S)**

- c. **Integration** (To improve the integrated communities African-Americans live in today)
- d. **Repatriation** (To build new black communities and relationships in Africa and the Diaspora)
- e. **Sovereignty** (To build new black communities in America and better relations among Blacks)

**3. How will Reparations Materialize? To Repair Renew and Revive the Black Family**

- f. In a Reparations Package: (Consisting of immediate compromises and long-term goals)
- g. Creating the Reparations Fund: plenty of amenities for the 3 models (Creating 8 regional funds)
- h. Emergency jobs and housing for Blacks from 18-54 (and a settlement for Blacks 55 and older)

1 **4. How can Blacks win Reparations? By learning about and participating in the Five Phase**  
2 **Plan!**

- 3 i. Learning the scope of repair should fit the magnitude of the crime. Since we know the  
4 damages and injuries were of great proportions and long lasting the compensation must  
5 equal that range.  
6 j. African-Americans have claims as victims of gross civil and human rights  
7 violations that include displacement, deculturation, enslavement, segregation and  
8 discrimination.  
9 k. The resources blacks can gain from filing a collective lawsuit and/or pursuing political  
10 action for past and present crimes will enable them to heal and prepare themselves to  
11 receive reparations with the intent of making the best use of the amenities as described  
12 above.

13 **In the Spirit of Our Ancestors,**
