Recommendations for ideal business operations in Steel Building Manufacturing

Standardization in design module – **Combined Codes required**

- Hyper customization/optimization sometimes leads to compromise on safety & beauty of the project
- Complexity of codes may lead to errors in designing.

Subsidy on Design Software

- License fees should be nominal to make it accessible to all.

Steps to control **volatility of Steel prices**

- To ensure smooth operations in Large Scale Projects.

Standard Training Program for Designing, Fabrication & Erection Manpower

- Recognized contractors/ Engineers to ensure proper and regular training.

Better Control Mechanism to ensure safety during production and erection

- Majority projects do not follow prescribed safety measures.
