New and Upcoming Technologies in Steelmaking

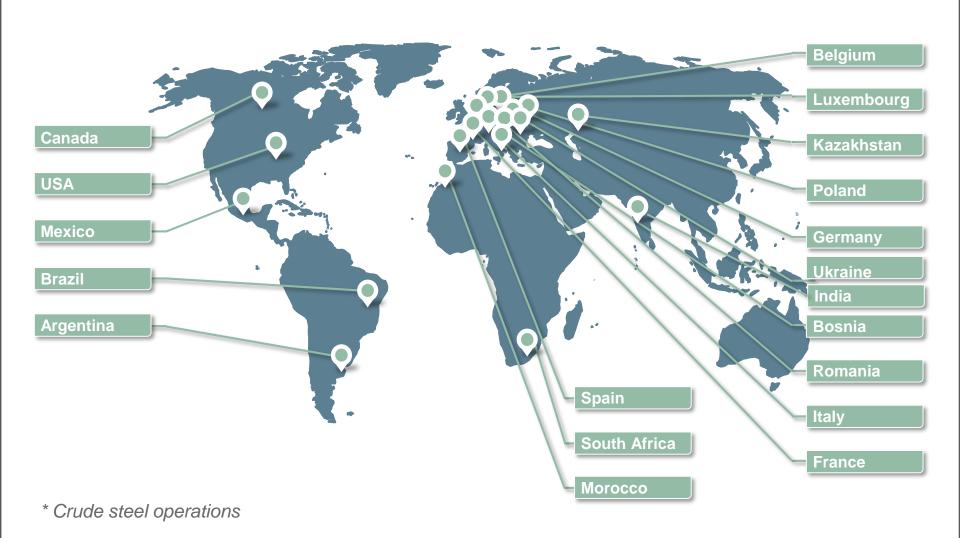

ArcelorMittal

Pinakin Chaubal January 21, 2020

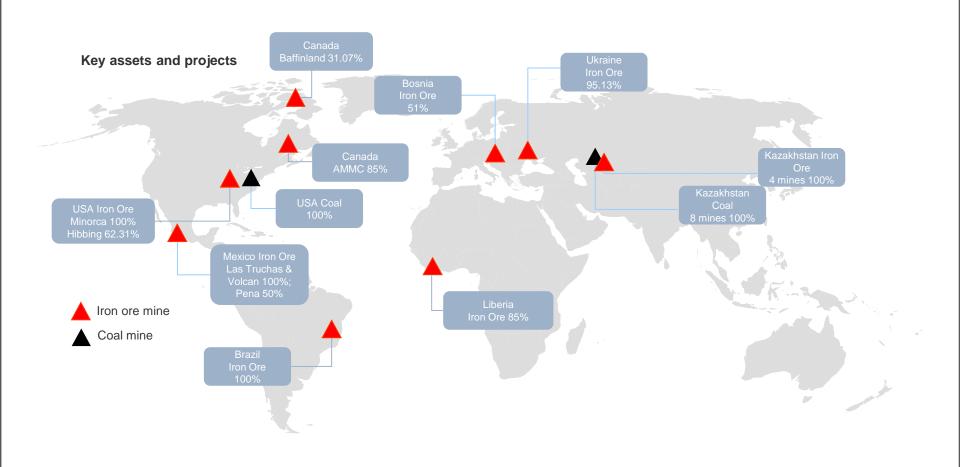

Arcelor Mittal

ArcelorMittal – Industrial footprint* in 19 countries

...and a global mining portfolio that addresses our steel needs and the external market

A Global network of R&D Centers

...which enables us to continually evolve the way steel is made...

Sustainable Manufacturing in the age of Digitalization

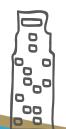

INTERNAL:

- Energy conservation
- Yield improvement
- Footprint optimization

Environment

EXTERNAL:

- Sustainable construction
- Sustainable mobility
- ...

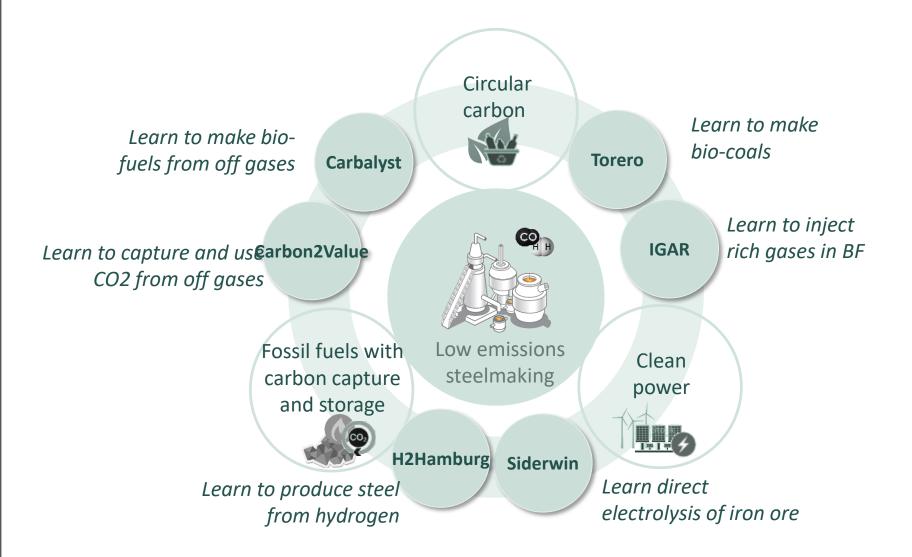

Digitalization

Digitalization

We contribute to sustainability via internal and external developments

Sustainable low emissions steelmaking embodying Circularity

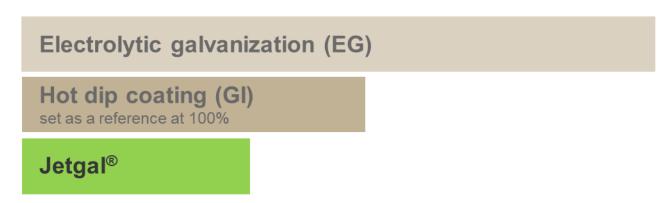

Highly Restricted 5

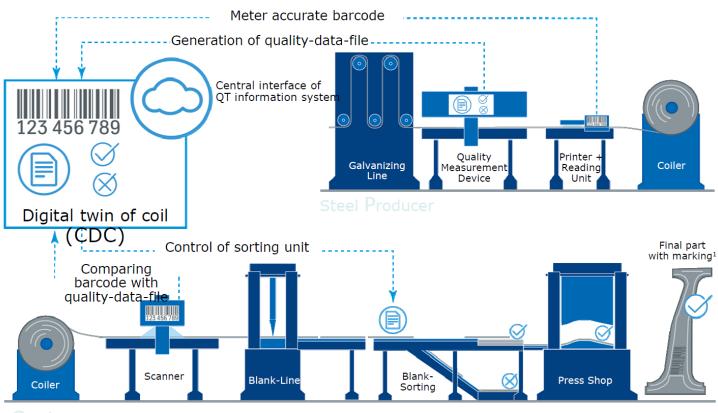

Relative contribution of coating step to Global Warming indicator:

0% 50% 100% 150% 200%

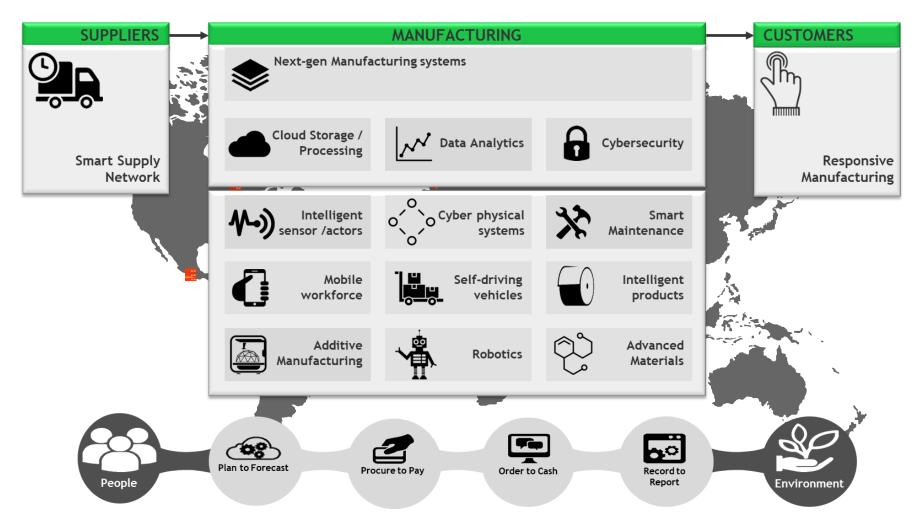

Consistent Repeatable product to Customer

Customer

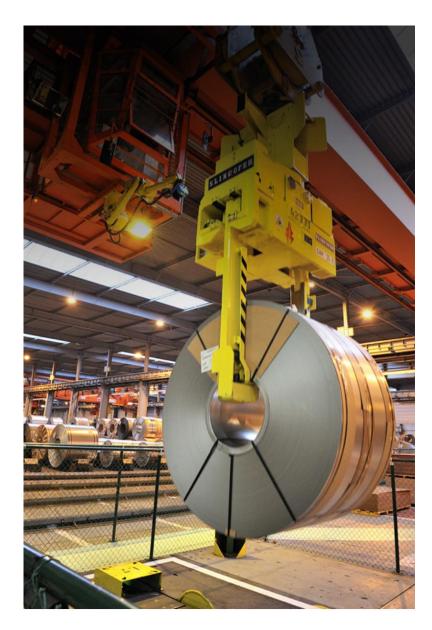

One fully digitalized Enterprise where everything is connected

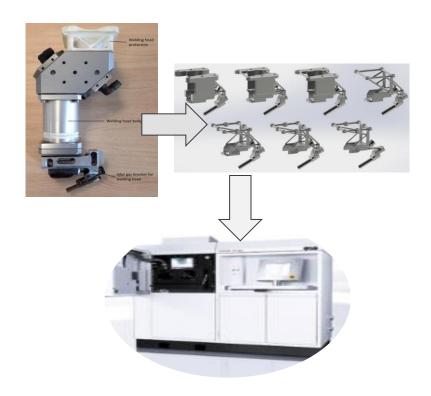

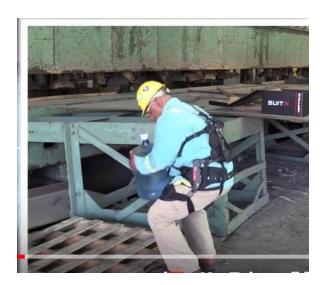

Leveraging emerging technologies......

3 D Printing

Exoskeletons

Thank you

Sustainable Manufacturing in the age of Digitalization
