

Forex Broker Trading Setup S&P-500 || Setup Developed By **Woelf, Premium Member FutureTech**

Top Chart Setup:

- 1 Minute, Standard Candlesticks
- T-scalper: Cloud Turned On and White Moving Average Lines with color removed.
- EMA Band: all lines turned off except 12. Make "Color 2" yellow.
- Conviction Sticks V2
- Expected Move MTF: set to 240
- T-Levels Dynamic
- Gray Zone V2

Bottom Chart Setup:

- Use two horizontal panels in Layout selector, bottom panel is a separate bar chart set to 3 minutes with the bars hidden.
- Gray Zone V2 (this is the only thing visible in bottom higher time-frame, 3min GZ provides higher time-frame confluence for your 1 min entry)

Entry:

- Price action moving outside of the cloud up or down, could be a consolidation, bounce, moving avg lines pinching together, etc.
- Candle, EMA Band, and both Gray Zones are green with no chop index for a long (Red for short)
- Use Dynamic T-Levels and EM 240 for additional confluence on entry. Trade away from these key levels.
