FOR IMMEDIATE RELEASE

Healing Vibes Collective will release "Art of a Dream" on November 6, 2026, an evolving 5:15 instrumental blending cinematic downtempo, New Age influences, world-inspired textures, and organic percussion. The piece begins spacious and dreamlike, then gradually expands into fuller rhythmic sections, creating an immersive musical journey that feels reflective, melodic, and alive.

Sound & Arrangement

Cello, flutes, clarinets, brass, electric guitar, handpan, synth textures, bells, bass quenacho, and a 396 Hz singing bowl move through changing combinations across the arrangement, with marimba appearing in the outro percussion section. The 396 Hz bowl is used for its distinctive pitch and resonant character as part of the composition's artistic palette, without making medical or therapeutic claims.
