

First-Time Candidate Dr. Raul Garcia Emerges to Challenge for US Senate Seat!!!

Photo Courtesy Dr. Raul Garcia Campaign

Congratulations, Dr. Raul Garcia!

Dr. Raul Garcia, a first-time candidate with a clear focus on the issues that matter most, has advanced to compete for the senate seat currently held by Maria Cantwell. He is known for his dedication to a people-first agenda, his fresh perspective, and his willingness to vote based on principle rather than party loyalty, is refreshing, compared to Maria Cantwell voted over 98% in her entire career along party lines. Garcia he is an advocate for Women's health, is pro-choice. Washington needs, a leader who will be guided by values and the needs of the people, not by partisan pressures.

In contrast, his opponent has served for 21 years and has not crossed party lines in her voting record over the past six years. Her tenure reflects a rigid adherence to party lines rather than a principled approach to problem-solving.

Beating a longtime incumbent will be a formidable challenge, but Garcia deserves an opportunity. What more can Cantwell do that she hasn't already done? Moderates are awakening and are eager for change. With unity and effort, we can support Dr. Raul Garcia in this crucial election and bring about the transformation Washington needs.

He stands on the moderate side of the issues.

Dr Garcia will take a stand against the reckless federal spending that has sent our national debt to dangerous levels and is a contributing factor in inflation. He will also work for policies that promote economic productivity, to reduce prices and costs for consumers.

FBI data shows that violent crime in Washington rose by nearly 82% between 2020 & 2022. This, in contrast to the national violent crime rate, which decreased. Our leaders have failed us, exposing the people of Washington to more & more violent crime while doing virtually nothing to protect us, our children and our communities.

As an ER doctor, Dr. Garcia has firsthand experience with the growing fentanyl crisis and understands the root causes and impacts of homelessness. His pro-choice stance and immigrant background underscore his

commitment to putting people first. As a physician and community leader, Dr Garcia fought to maintain healthcare for women, while Sen. Cantwell did nothing. As a United States Senator, he will take swift action to solve this crisis and start to bring OB-GYN care back to the communities where women & families have lost local access.

Let's rally behind Dr. Garcia and work together to make a meaningful difference. Change is within reach, lets ensure that moderate voices have a say in Washington State. To get to know him better we encourage you to [watch our meet and greet event](#) Dr. Garcia's talk begins at 44 minutes. Or watch his [recent interview](#).
